

CURRICULUM VITÆ

Jonathan Rooney

CAREER PROFILE

Cellphone : (514-571-5077)

Email : Rooney@stunt-it.ca

LinkedIn: Jonathan Rooney

Profile

System Administrator specializing in Windows technologies and VMware. I'm noted for my dynamism, analytical skills, and my ability to solve problems effectively and rapidly. I'm looking for a career opportunity where I could apply my current skill level of systems administration and pursue my specialization on different virtualization products. Over 15 years of experience in Information technology.

TYPE OF INTERVENTIONS

Expertise:	Banking systems, Health, Industrial, Government
Types of interventions:	<ul style="list-style-type: none">• Establishing requirements for the businesses.• Software acquisition• Systems administrator Windows, VMware, Linux• System performance analysis• Configure, upgrade and maintain hardware• Coordination of logistics resources• Documentation of new processes.• Improving operational efficiency• Security and compliance

EDUCATION AND TRAINING

2016	VMware 6 Certification (VCP6-DCV)
2016	Zerto certified Professional. Master of disaster (ZCP 4.5)
2014	VMware 5.5 Certification (VCP5-DCV)
2014	VMware vSphere: Install, Configure, Manage [V5.5]
2006	CTEC 2596: deploying & managing SMS 2003
2004	CCNA Course McGill University Montréal, Québec
2001	Windows 2000 Server, Certification 70-215
2002	Windows 2000 Professional, Certification 70-210
1999-2001	Microcomputers and networking (AEC)
1996-1998	Human sciences John-Abbott College
1991-1996	Jean XXIII High school (DES)

LANGUAGE SKILLS

French, English, and Spanish knowledge

PROFESSIONAL EXPERIENCE

Stunt-iT

(9286-7894 Qc inc)

(Jan-2025-Present day)

Educational, test and development.

Prof of concept VMware to Azure.

- Migrate VMs from vCenter 8 to Azure
- Prepare Azure environment to import VMs from vCenter 8.
- Deploy OVA from the Azure portal.
- Scan vCenter environment and replicate VMs to Azure.
- Perform failovers from vCenter to Azure.

Prof of concept VMware to Proxmox.

- Build Proxmox cluster
- Migrate VMs with PVE-Esxi import tool into proxmox cluster.

Prof of concept VMware to Hyper-V

- Deploy Hyper-v node.
- Set up networking.
- Convert VMs from vCenter using StarWind.
- Import converted VM into Hyper-v.

Educational:

- Online training for AZ-900 MS Learn.
 - Online training for AZ-104 (in progress)
-

Domtar

Resolute Forest products

VMware administrator / Storage admin

(2021-2024)

Responsibilities:

Administer VMware infrastructure and storage arrays.

Daily administration and operations on software:

- Site recovery Manager / SRA 9.0.2
- VMware Aria Operations 8.18
- VMware Aria Operations for Logs 8.18
- vSphere 8.3, 7, 6.7, 6.5

Daily administration and operations on hardware:

- HPE SN2410M Mellanox fabric switches.
- HPE Nimble Storage arrays.
- PowerEdge R660 Esxi hosts.
- HP ProLiant DL380 Esxi hosts.
- C7000 ProLiant BL460 Esxi hosts.
- 3Pars Storage

Activities:

- Assist in the migrations of vCenters and upgrades.
- Deploy, install and manage Esxi hosts and virtual machines.
- Build Windows server Golden templates.
- Create, optimize Content libraries across 4 vCenters.
- Documented many VMware processes for the client.
- Provided training other team members with newer processes.
- Perform vCenter, Esxi, HP, Dell servers updates and patching to meet security compliances.
- Configure and enable disaster recovery on critical VM server and VDI endpoints.

Minister of Justice of Quebec

Analyst specialist in information technology (Consultant)

(Oct-2020-2021)

Responsibilities:

Administer VMware Horizon View infrastructure

- Upgrade vCenter and production hosts to 6.7u3
- Install and configure Horizon connection server 7.12
- Install and configure App Volumes 4.1
- Create new Desktop pools
- Migrate 150 VDI workstations to new vCenter 6.7
- Add VDI workstations to new Horizon connection server
- Capture applications with App Volumes (POC on Eval license)
- Create and optimise Windows 10 Golden image for Linked Clones
- Day to day operations with Horizon server, agents, and clients.
- Resolve VMware / Horizon view incidents

-Train help desk agents for VDI support

Saputo

System administrator VMware-Wintel (Consultant)

(2019-June 2020)

Project: Windows 2008 End of life

- Identify all Windows 2008 servers globally
- Elaborate detailed evaluation of global project
- Document and update sever description with business owners
- Search for possible migration path
- Contact software vendor, request Statement of work for each server upgrade or migration
- Reduce server footprint
- Build and document all server migrations
- Perform the decommission of obsolete servers
- Windows 2008 file server migration to Windows 2019
- Standardise, consolidate, and restructure file servers.

(2018-2019)

Responsibilities:

- Upgrade all VMware environment to 6.7
- Setup vRealize and provide reports of issues to Wintel team to investigate.
- Migrate VMs from on prem datacenters to IBM cloud.
- Provision VM's in Azure
- Create RDS proof on concept on Windows 2019 servers

(2017-2018)

Responsibilities:

- Day to day operations
- Firmware and software upgrade on all remote VMware datacenters
- Global vCenter consolidation (AUS, ARG, US, CAN) to IBM cloud
- Upgrade all VMware appliances and hosts to version 6.5u3
- Setup Disaster recovery site

(Nov 2016-2017)

Project: IBM Cloud (BlueMix, SoftLayer)

- Assist in the designing of new 2 new datacenters at IBM cloud
- Provision ESXi 6.5 hosts and build multiple clusters
- Configure networking with NSX
- Setup VSAN storage

(March 2016 - July 2016)

Responsibilities:

- Head of a migration project ~ 80 virtual servers. (3 vCenter, 50 hosts)
- Planning calendars with server business owners
- Acquisition, installation, and configuration of software to perform the migration (Zerto)
- Designing and implementing a disaster recovery plan
- Disaster recovery testing
- File server consolidation
- vCenter upgrade and patch updates (VMware 5.5 U3)
- Server migration Windows 2003, 2008 to 2012
- Documentation of processes

Technologies: VMware 5.5, Windows 2008, 2012, Zerto, Dell EqualLogic, Update Manager

(August 2015-December 2015)

Mouvement Desjardins  **Desjardins**
Project and technology Integrator (Consultant)

Responsibilities:

- Acting as an expert with the various business projects and evolution
- Participate in the integration of project deliverables to the operations team
- Deployment assistance and debugging new applications
- Write and maintain relevant documentation and guides
- Installation and troubleshooting SCOM2012 agents on PCI servers
- Integration of new services to existing applications

Lab environment:

Build VMware 6.0 lab environment , Perform upgrade VMware 5.5 to 6.0

Build Hyper-V 2012 R2 lab, SCVMM

Technologies : Windows server 2008 R2 /2012 R2, VMware 5.1/5.5/6.0 , SCOM 2012, Hyper-V 2012 R2/CORE, SCVMM

Centre de santé et de services sociaux
du Cœur-de-l'île

(Dec 2014-June 2015)

Centre de Santé et de services sociaux du Cœur-de-l'île
Project and technology Integrator(Consultant)

Task: Telephone system migration, WI-FI and data on Black Fiber

- Install and configuring core switches between 5 sites connected with black fiber
- Migrate communication antennas to fiber. Configure VLANs and routing between sites.
- Migration planning with other teams.

Technologies: HP Procurve switches and HP E3800 A5820X, Black Fiber

Task: Server Migration 2003, 2008 to Windows2012

- Perform the migration of physical and virtual servers to Windows 2012.
- Analysis of application compatibility, roles and features.
- Migration planning strategies and Build book development.

Technologies: Windows 2012R2, WebDeploy, IIS 8.5, SQL 2008R2, VMware 5.1

Task: Windows 7 VDI images update

- Perform the image design for a multitude of departments.
- Create and optimize windows 7 gold template
- Create pools, assign permissions, and deploy images (Dedicated and Linked clones)

Technologies: Windows 7, VMware 5.1, Horizon View 5.3, Teradici, LG, and VDI

Task: Central scanning and camera system implementation.

- Installation and configuration of physical servers and dedicated thin clients.
- Implementation of an isolated network for cameras.
- Coordinate system migration between departments.
- Coaching employees how to operate new camera system

Technologies: IBM systemX3650 M4, Raid 10, Windows 2012 SQL2012, Windows7, VMware 5.1, View 5.3, HP V1970, NumerX2, GESPHARx8, GesCam.

Task: Optimizing VMware environment

- Perform overview of the VMware environment.
- Isolate and document performance problems issues and propose solutions.
- Add ESXi hosts in the cluster and adjust the DRS settings.

Task: Technology Infrastructure Audit Project

- Identify performance issues in a virtual environment, RDP and VDI.
- Provide a final report with recommendations.

Technologies: VMware 5.1, 5.3 Horizon View, ThinApp, RemoteApp and VDI

(Jan 2014-June 2014)

Mouvement Desjardins  **Desjardins**
System administrator Wintel, VMware (Consultant)

Responsibilities:

- Analyze and resolve Wintel incidents.
- Achieve production change requests.
- Maintain and perform daily operations in the vCenter environment.
- Process Improvement of Incident Management
- Preparation of documentation for Commvault production incidents
- Coaching process management with N1-N2 groups
- Daily operations of VMware administration.

Technologies: Windows 2003-2008, VMware 5.1, Commcell V10, IIS, Cluster

(2009-2013)

Laurentienne bank of Canada  **BANQUE LAURENTIENNE** 
Systems administrator (Consultant CGI)

Responsibilities:

- Constraints and challenges research.
- Analysis of material requirements.
- Feasibility assessment for a virtual and physical infrastructure projects migration.
- Completion of conceptual tests that allows validation of components and selected solutions.
- Documenting processes related to solutions.
- Installation and configuration of a lab environment under ESXi 5.1
- Setup, configured VDP, VOPS, Vshield, and VSA plug- in into environment.
- Administration of a VMware vSphere 4.1 multi-sites, multi cluster environment.
- Optimize, secure, and update virtual infrastructure.
- Coaching and technical trainer.
- Evaluate performance and system integrity.
- Virtualisation of physical system (P2V).
- Additions of ESXi server to cluster.
- Addition and modification of VDS, PVLAN, DRS and HA.

Task: Virtual machine Image deployment for VMware View

- Installation Horizon View 5.1
- Addition of 2 new ESXi 4.1 hosts into existing cluster
- Creation of base template images
- Template deployment with vSphere Power CLI script
- Creation of pool, managing desktops and entitlements in View

Technologies: Windows server 2008, SQL 2008, VMware View 5.1, ESXi 4.1

Task: Conceptualization SCOM 2012

- Conception of SCOM 2012 into test environment.
- Install and test multi-platform clients (Unix/windows)
- Create architectural documents
- Creation of action plan to implement into production
- Measurement of progress and results

Technologies: Windows 2008/2003, ESXi 4.1, SCOM 2012, Windows SQL 2008, Sun Solaris 10, IIS 7.0

Task: Conceptualization Update Manager

- Conception of Update Manager for vCenter server 4.1
- Design laboratory to reflect production DMZ topology
- Designed and proposed different security solutions for updates delivery. (Air gap, published updates with IIS HTTPS)

Technologies: Windows 2008, vCenter Server 4.1, IIS 7.0

Task: ESX Migration

- Delivery of project version changes of IT environment ESX
- Preparation of migration planning
- Delivery of a laboratory to perform migration tests
- Organizing brainstorm meetings with different groups involved to validate their functional needs and collect feedbacks.
- Analysis of existing tools and environment exploitation management
- Elaboration of backup plan

Technologies: Windows 2003, VMware vSphere, ESX 2.5/3.5, Active Directory, SAN, Cluster, Cisco Fabric Manager, Navisphere, Linux, Open Filer

(2007 – 2009)

Banque Laurentienne du Canada
SMS 2003 Administration (CGI Consultant)

Responsibilities:

- Administration and management of SMS 2003.
- Perform daily, monthly, and periodic maintenance tasks
- Planning and deploying software rollouts.
- Assure security and compliance of workstations and servers.
- Automation and management of security
- Supervision and support for the software delivery team
- Creation and distribution of Microsoft security updates packages

-Provide software, hardware inventory when requested.

Technologies: SMS 2003, Windows 2003, MS SQL 2005, VBScript, ITMU

(2006- 2007)

Banque Laurentienne du Canada
Level 3 user support (CGI Consultant)

Responsibilities:

- Diagnose and troubleshoot hardware and software issues.
- Investigate reoccurring cases received by L2 and L1 support.
- Evaluate severity of issues in order to develop permanent solutions accordingly.
- Image deployment and update images on RIS servers.
- Creation and management of AD and Exchange accounts
- Creation and modification of GPOs

Technologies: Windows 2003, Active Directory, DNS, DHCP, Windows XP, Networker, RIS, Exchange 2005, GPO

(2003-2006)

Bell Mobility
Level 1 and 2 user support (CGI consultant)

Responsibilities:

- Answer customer calls and resolve issues related to workstations, software and peripherals.
- Diagnostic, evaluates and communicates with higher support level to report major incidents
- Installation of applications and updates.

Technologies: Windows Xp, Citirx Metaframe, SAP, AD, SMS, HEAT, MS Office

SOFT SKILLS AND EXTRACURRICULAR

- At ease in a multicultural environment, analytic ability, works well under pressure, innovative spirit, leadership, versatility, works well in a team.
- Full member of Union des Artistes (UDA)
- Full member of Alliance of Canadian Cinema Television & Radio Artists (ACTRA)
- Professional stuntman and actor for Quebec, Canadians, and U.S TV shows and movies.
