

Formulated in the Colorado Rockies

Silver has been used for thousands of years as an effective antibiotic

- The ancient Greeks, Romans, Phoenicians, and Macedonians used silver extensively to control infections and to keep food and drink from spoiling.
- Silver was the main antibiotic used by doctors in the U.S. until the advent of less expensive penicillin in 1940.
- Dr. Robert Becker, Chief of Orthopedic Surgery at Syracuse University, discovered that silver ions not only helped wounds heal quicker, but actually caused bone, muscle, and nerve tissue to regenerate.
- The National Defense Medical College of Japan conducted clinical studies in 2013 that demonstrated silver ions not only killed bacteria, but also destroyed the human influenza virus.

Who We Are

About Us

At Silver Solutions we have a heart for helping others. In a world where medical and pharmaceutical costs are skyrocketing we wanted to provide a natural alternative without all the negative side effects. We began our business with a desire to provide an affordable product that actually works. Ionic silver is extremely effective against a wide range of pathogens including bacteria, viruses, and fungus. Additionally, it boosts the immune system providing a general preventative against infection. Our manufacturing process was developed by the same engineer who developed silver ion generators for NASA. NASA used silver on the Apollo and Space Shuttle flights to keep drinking water free of bacteria and viruses. Our 6 parts per million (PPM) solution is gentle enough to use on eye infections or diaper rash, yet it kills antibiotic resistant bacteria like MRSA on contact. Silver Solutions is natural, safe, and non-toxic. Given better choices we believe you can live better.

Testimonials

I am a diabetic and suffered with a non-healing ulcer on my back for two years. I sprayed Silver Solutions on the wound twice a day and it was completely healed in 6 days!

Leonard, Colorado

I had shingles on the top of my head. I sprayed Silver Solutions on it and the nerve pain in my ear and in my throat was better by morning! After spraying it for a week my shingles was drying up and flaking off. I was amazed that such a simple product could relieve my suffering so quickly.

Brad, Montana

I add a teaspoon of Silver Solutions to the water in my CPAP machine at night to keep the lines free of bacteria. My sinuses have also cleared up and I can breathe easily for the first time in years!

Gary, Missouri

I use Silver Solutions for myself and for my pets. I have used it to kill lice on my birds and ticks on my dog. I also used it when another dog tore my dog's ear. The tear didn't just heal quickly, the edges of the tear actually healed back together!

Michael, Colorado

Directions for Use

- For sore throat or other mouth sores apply 4 to 7 sprays directly on affected area 2 to 3 times per day
- Spray directly on cold sores at first indication of onset
- Spray on insect bites to relieve itching and speed healing
- Apply directly to cuts, scrapes, burns, rashes, and non-healing wounds. Cover with bandage as needed.
- Apply directly on athletes' foot, ringworm, toenail fungus, candida, yeast infections, hemorrhoids, and diaper rash
- Take one tablespoon for indigestion
- Rinse your mouth with one teaspoon twice a day for good oral health
- Spray directly on problem areas for pets
