

## HUMAN RIGHTS ACTIVISTS ARE CALLING ON THE INTERNATIONAL COMMUNITY TO BOYCOTT HEWLETT-PACKARD.

Do not buy HP computers, printers, inks, or other products until HP corporations stop profiting from the Israeli occupation and from human rights violations.

Now is the time to redouble our efforts and increase pressure on both HP Inc. and HP Enterprise **until they publicly and verifiably end all complicity in the violation of Palestinian human rights.**

- More than 1.8 million people have signed a petition calling on HP to end its role in Israeli apartheid.
- In 2014, 1,000 activists marched on an HP conference.
- There is active campaigning against HP in the United States and across Europe. Dozens of student governments have called on their universities to divest from HP.
- Christian, Jewish, and Muslim faiths groups have voted to divest from HP, and over 20 churches have gone HP-free.

### Don't Buy!

## SUPPORT PALESTINIAN RIGHTS:

# BOYCOTT HP

# WHY BOYCOTT HP?

## HP CORPORATIONS PROFIT BY SELLING APARTHEID TECHNOLOGIES

**HP Enterprise provides servers to the state of Israel for its population registry.** IDs issued based on this registry determine one's level of rights.

Under this system, Jewish citizens have more rights than Palestinian citizens, who have more rights than Palestinians from the West Bank, Gaza, or East Jerusalem.

**HP Inc. is the exclusive provider of computers to the Israeli military,** which carries out the occupation of the West Bank, including East Jerusalem and the Gaza Strip, and in the last decade has carried out the brutal siege of Gaza.

**HP Enterprise provides servers and technology used in Israeli prisons.** Israel's prison system is used to suppress Palestinian political activity, and to stifle opposition to its policies. By helping Israel run its prisons, HP is at the heart of Israel's use of mass incarceration to undermine Palestinian opposition to apartheid.

## HP SUPPORTS MILITARISM, MASS INCARCERATION, AND DOMESTIC SURVEILLANCE AROUND THE WORLD

### HP's profiting from and support for human rights violations are not limited to Palestine:

- In 2015, HP Co. made over \$2 billion in profits from military contracts.
- HP technologies are used by a variety of prisons and law enforcement agencies that form part of the U.S. mass incarceration system.
- HP donated technology to the U.S. National Security Agency (NSA) that continues to play a key part in the NSA's illegal domestic surveillance programs.

## THE CAMPAIGN TO STOP HP

In 2015, Hewlett Packard Co. split into two corporations: HP Inc. (consumer goods) and Hewlett Packard Enterprise (corporate services). Both have contracts with the state of Israel and Israeli military, and both continue to benefit from the HP brand name.

**Recently, the global campaign targeting HP has seen significant positive progress. HP corporations have dropped several significant contracts so far:**

- HP no longer operates access control systems at Israel's checkpoints and apartheid wall.
- HP no longer provides military servers and IT infrastructure to the Israeli military (though HP continues to supply computers to the military).
- HP no longer operates the Israeli population registry (though HP continues to provide the Israeli government with the servers on which the population registry is stored).

**However, HP has not guaranteed it will not engage in such activities in the future.**

Make your place of worship, trade union, school, or workplace HP free. Support the campaign by publicly pledging to stop buying HP products. Research if your institution is invested in an HP corporation.
