We use the term OEM grade to describe our seats. That means that they are the same quality as those used on new pontoon boats. New boat manufacturers have extended warranties and the reputation of their brand is riding on the quality of their seats. There is a completely different quality of seats built for the aftermarket. Our seats have mildew resistant and color fast 30 oz. Marine Grade vinyl. When we claim that our vinyl is 30 ounce, it really is 30 ounce *not something less*. We use only virgin foam that stays firm for years.
