

Things When Arriving This Season

- Turn on the main water supply valve located in the pipe exiting from the wall above the hot water heater. The red handle should be pulled up (*the opposite direction of where it was when you arrived*).
- Run water to remove trapped air in the pipes
- Turn on all circuit breakers.
- Set temperature control to desired setting and turn the humidistat to on, if you have one.
- Turn on ice maker and throw out the first batch.
- Plug in TV, radio, appliances, etc.
- Take plastic wrap off toilets.
