### *An Overview of Protective Coatings for Industrial Applications*

**Paul Trautmann**

**Project Development Manager, The Sherwin Williams Co.**

This talk will include a discussion of generic coatings and linings for atmospheric and immersion service and will highlight the basic characteristics of the various types of coatings, their intended use, and general limitations. The presented information will incorporate articles and standards from NACE and SSPC organizations, AIA approved presentations from the Sherwin Williams Company, and other industry literature, to provide an educational overview of the protective coatings industry. Topics to be discussed will include coating compositions, protection mechanisms, types of coatings, acceptable substrates, surface preparation, curing mechanisms, application methods, and industrial applications by coating type.

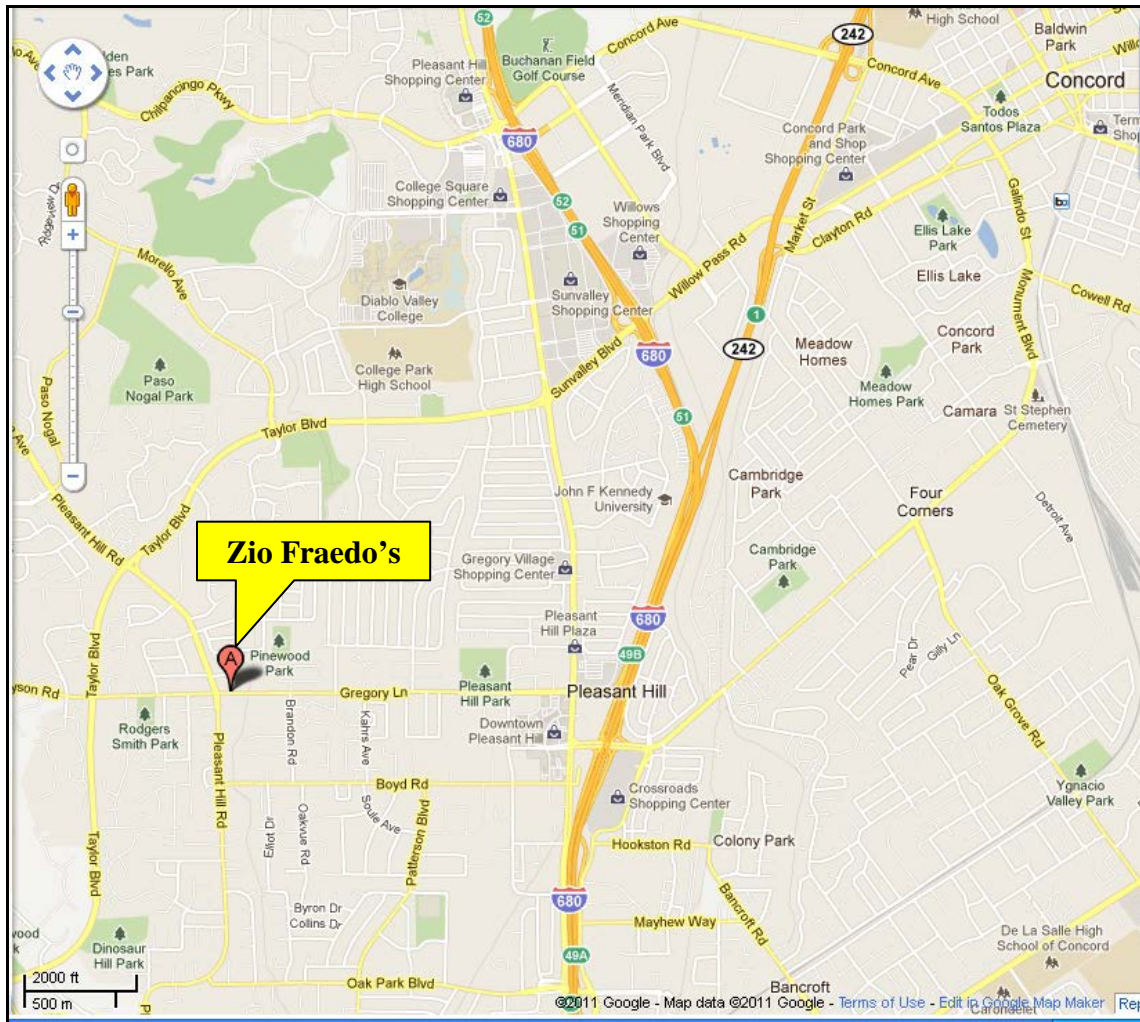

**Paul Trautmann** is Project Development Manager with The Sherwin Williams Company, Protective & Marine Coatings Division. Paul's position is with the Engineering Services Group. He has been with the Protective Coatings Division for 15 years. His current position allows him to focus on the engineering community to provide specifications, product selection, and to coordinate support with industrial clients. Paul graduated from Cal State University, Bakersfield in 1994 with a degree in Business Administration. He is a NACE Certified Inspector. Paul currently lives in Bakersfield with his wife and daughter. He has been an active supporter of the NACE San Francisco Sections, and regularly attends our meetings. Through Paul, Sherwin Williams has been an annual Sponsor of the San Francisco Section.
