

# Frequently asked questions; SJ-100 Jogger

Why would I need a paper jogger?

-We recommend using the SJ-100 before printing, collating, binding and cutting to significantly reduce static and double feed.

Is a stand available for this jogger?

-Not at this time, this is a tabletop machine

Does this jogger have air?

-Yes, the SJ-100 comes standard with vibration & air

Can the bed be adjusted of the SJ-100?

-Yes, with the simple turn of a knob you can adjust the degree of the bed

What is the maximum size paper I can use?

-Maximum sheet size is 13 x 19 inches

How much paper can I load at once?

-Maximum capacity is about 4 inches

Can I use the vibration without using the air?

-Yes, both the vibration & air have their independent switch.

What power is required for this jogger?

-The SJ-100 requires standard 110 volts.

Does this machine had a speed control?

-No, the SJ-100 only have 1 speed

Will this machine slide on the table with the vibration?

-No, we have included heavy duty rubber feet to avoid movement.

Would I be able to jog thick stock such as cardboard or chip board?

-Yes, this machine has the power to jog those thick stocks.
