

RESOLUTION CR-1-02 (Priority 1) (2002)

NATIONAL ASSOCIATION OF PIPELINE SAFETY REPRESENTATIVES

NAPSR CENTRAL REGION RESOLUTION
Resolution CR-1-02
Approved May 9, 2002

Whereas the current section 192.305 addresses inspection requirements for construction.

And

Whereas, the current wording of that section is not specific on what constitutes inspection.

And

Whereas, distribution operators throughout the country are having individuals who do the construction work self-inspect,

Therefore be it resolved,

That 192.305 be amended to prohibit a contractor that is hired to do construction work for an operator from inspecting its own work. The following language is suggested:

192.305 Inspection: General

Each transmission line, ~~or~~ and main must be inspected to ensure that it is constructed in accordance with this part. No operator shall use a person to perform these required inspections if that person is performing any construction activities subject to inspection. Nothing in this section shall prohibit the operator from inspecting construction activities with operator personnel who are involved in the construction activities.
