Report of the General Manager

Paul said the garage renovation is moving along. The demolition is done and blocked in. The eaves will need to be replaced. He will borrow a sprayer to paint the inside and outside of the garage after he patches the holes. Paul said the man door outside looks fine but the inside has some surface rust but doesn't seem to be rotted. The next step will be getting the garage doors installed and the electrical work done. The remaining contractors will be brought in over time to finish up. Options for heat will be looked into but Paul said most likely it will be propane heat.

Lead and coppers went out last week and 10 out of 20 have already been returned.

DEP has requested a service line inventory. Every service line in the district has to be checked to make sure there is no lead.

Paul said he closed access to the Townsend Road wellfield for a couple of days because a tree fell down and blocked the roadway.

Paul attended a water tank construction class and tour. He was able to see a tower that he is interested in having constructed at the Kemp Street location in the future. Jason suggested possibly hiring an engineer to do a feasibility study on replacing the tank and determine how to proceed. Paul will continue to look into it.

Other Business

As there was no further business, a motion was made and seconded to adjourn the meeting at 7:00 PM.
