

12P/PONS-BROOKS 'DEVIL' COMET

The purpose of this illustration is to depict the Trajectory of what has been deemed the 'Devil Comet' of Comet 12P/Pons-Brooks. Why this Comet is of particular Significance, is that it conjoined the Parade of Planets that configure right as the 3rd and last Great American Eclipse occurred over the Continental USA. What this means is that as the Eclipse reaches its Apex near the Heart of the USA, and the 'Lights Go Out', the People in the Path of Totality will see this Comet. It will be off to the Side of Jupiter, just above the Ecliptic in the Sign of Aries. One will be making some Observations and then correlate that the many Data Points that one believes does carry some Prophetic Weight as to its possible Inference in relation to the End Times, generically but as it pertains specifically to the USA. What that, the Depiction will be based on a Stereographic View of the Universe from a "Top View". The Comet 'Corkscrews' since 1958, up until it reaches Vega in 2023. From there it catapults to the Planet Parade through Aries and Conjoins near Jupiter. One is insinuating that the Heavenly Sign is that of a Decision, a Choice of which GOD the USA will follow, the Devil or the Deliverer? It is a Celestial Reminder that it was Jesus, the Aries or Sacrificial Lamb who Paid for Sins to have Humanity restored, Spirit, Soul, Body and Mind.

TRAGECTOTY OF COMET FROM ENTERING AND EXITING OF THE ECLIPTIC

Vega is the 5th Brightest Star in the Visible Universe. The Star is relatively close at only 25 Light-Years (7.7 Parsecs) from the Sun.

12P/PONS-BROOKS COMET

Type: Periodic
 Magnitude: 11.1
 Absolute Magnitude 5.0
 Mean Sideral Time: 12H 13m 43s
 Coma Tail Length: est. 125,000 KM

Date and Time		Julian Day		
2024	- 4 - 8	6	:	6 : 6

DEVIL COMET

The Comet had Ejection of Gases that supposed contributed to the apparent 'Look' of having 'Horns', the Devil's Horns. Others attributed it to looking like the Star Wars Millennium Falcon.

Transit: 9h 49m
 Object: Never Rises
 Parallaxic Angle: -148° 21' 46.5"
 IAU Constellation: OCT
 Orbital Velocity: 26,347 KM/S
 Sideral Period: 71.373 a
 Synodic Period: 1.014 a
 Phase Angle: +28° 47' 45.3"
 Elongation: +88° 35' 33.0"
