

IBI Group is looking for Construction Technicians to provide oversight of various water and sewer projects that we have provided engineering design for throughout Ohio.

The projects vary from water line and sewer line projects to treatment plant projects.

The projects are located in Franklin, Pickaway, Madison, Adams, Athens, Perry, Meigs and Trumbull Counties.

These projects start from March – June of this year.

The positions are hourly, as needed, and we pay all travel and hotel costs if a Construction Technician stays away from home.

We have found that water and wastewater operators are well suited to provide construction observation, through working with our Construction Administrators and Project Managers.

Please ask any interested parties to contact me at [kevin.wood@ibigroup.com](mailto:kevin.wood@ibigroup.com) or on my cell at 614-361-4996.
