

SYSTEM #5 PIPE MARKERS

High Performance Laminated Polyester Markers

Self-Adhesive Polyester System #5 Markers

Are used to identify piping systems in industrial environments that are expected to reach higher temperatures or harsh exposure to chemicals. Markers are constructed using white polyester with a clear polyester overlamine.

Polyester offers superior temperature, chemical and UV resistance compared to vinyl markers. Markers are supplied with aggressive acrylic adhesive with an extra heavy coating to ensure adhesion to a variety of pipe surfaces. Clean, dry surface and 50° F required for installation.

ADVANTAGES

- Temperature Range -40° — 248°F (-40° — 120°C)
- Chemical Resistant
- Abrasion Resistant
- UV Light Fade Resistant
- No Minimums On Stock Markers
- Same Day Shipping Available
- No Custom Set Up Charges
- Markers And Arrows Are Sold Separately
