

Libra Forensic Consulting, LLC

Forensics For Investigators

The end result for any investigator or detective attending this 3-day course will be a new approach to crime solving. Attendees will be able to increase their solve rate by understanding crime scene methodology and applying it to the following aspects of their investigations:

- Scene walk through to identify the most crucial and often missed items of evidence
- Recognizing staged crime scenes to help better identify manner of death (suicide vs homicide)
- Improving the interview and interrogation processes by better comprehending what occurred in the scene even if investigator only spent a short amount of time within scene
- Enhanced testifying skills by understanding the forensics behind your decisions. With increased knowledge comes increased confidence while on the stand.

This course is neither a typical investigation course nor a course for CSIs. It was designed specifically for detectives to greatly improve their interpretation and analysis of the cases assigned to them from a purely forensic standpoint. Attendees will walk away with many additional tools in their skill set to solve cases. Detectives and team leaders without a forensic background will benefit greatly from this course.

Course Objectives:

- Demonstrate knowledge of crime scene processing
- Demonstrate understanding of the scene to resemble event as closely as possible and how to explain & overcome “post-incident” changes
- Evidence recognition
- Recognize both spatter and non-spatter bloodstain patterns and understand how this knowledge helps during interrogations
- Determine bullet trajectory by understanding aspects of shooting reconstruction
- Demonstrate the understanding of forensic terminology for report writing
- Demonstrate the ability to recognize key elements to staged crime scenes
