

THE GREAT AMERICAN ECLIPSES

The purpose of this study is to analyze the possible prophetic and esoteric implications of the total solar eclipse that crosses America on August 21, 2017. What is unique about this crossing is that it dissects the entire nation from west to east at a diagonal. Certain places near the point of Greatest Eclipse suggest a spiritual connection to Egypt and Isis and the dividing of the nation, at least geographically. This study suggests a spiritual correlation to this celestial phenomenon mirrors the rise of the Spirit of Isis or Satan over America. This demonic spirit has now dissected or divided the land on many levels, racially, economically, politically, morally, socially, etc. This has been brought about by design as the endgame for America. The total solar eclipse of August 21, 2017 will enter the continental USA around the area of Lincoln Beach in Oregon. What is amazing, as others have pointed out is that this traversing of a total solar eclipse in America has not occurred since 1918, exactly 99 years. The next total solar eclipse over the continental U.S. occurs on April 8, 2024. What is unique about this subsequent one is that it will mark an 'X' in the 'heart' of the USA. Oddly enough in once recognized the occult numerology, the duration of totality lasts at least 3 minutes and 22 seconds on the east coast of Maine.

This is the infamous 322 *Skull and Bones* Secret Society brand. It will also stretch to 4 minutes and 27 seconds in southwestern Texas. The August 23, 2017 marks the first time in 99 years that such an eclipse occurs of this nature.

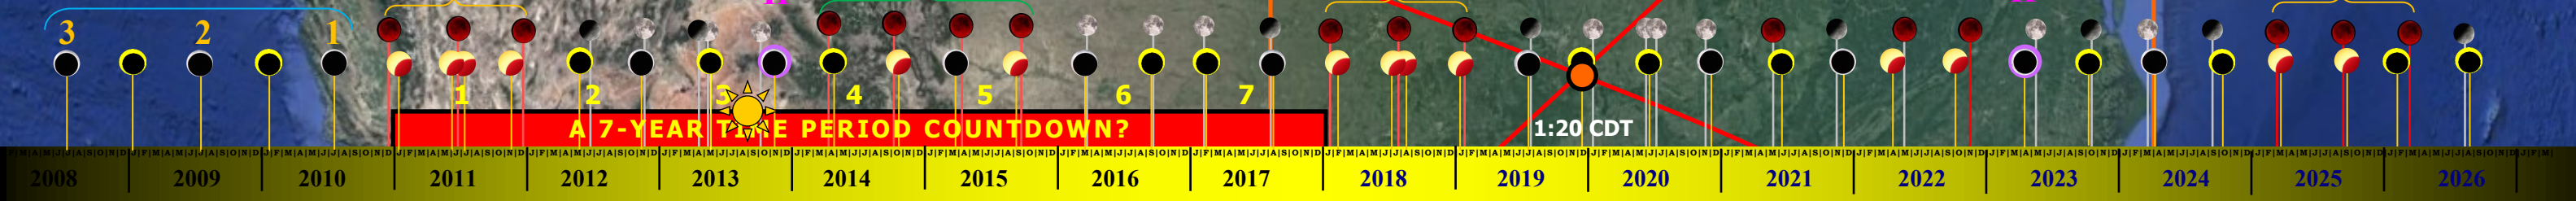

The timeline could suggest that based on the time and place of the Great American Eclipse, the start of the Triad of Blood Moons in 2018 with the rare Central Bull's Eye one could be a start of a prophetic time sequence that is yet to be determined.

The timeline illustrates that the Great American Eclipse coincides with the Great Sign in Heaven of Revelation 12 of the Bible. Both perhaps are signaling that there is a 'beginning' or sorts prophetically that will usher in a dramatic division that these 2 solar eclipses appear to suggest.

The center line's last contact with the U.S. occurs at the Atlantic Ocean's edge just southeast of Key Bay, South Carolina. The center line of the solar eclipse crosses through 10 states. If one does a study of the Biblical significance of this possible numerical inference, the number 10 occurs 242 times. The August 2017 eclipse occurs in the 241 years or at the eve of the 242nd year.

SOLAR ECLIPSE
A Solar Eclipse occurs when the Moon passes between the Sun and Earth.

LUNAR ECLIPSE
A Lunar Eclipse occurs when the Moon passes behind the earth so as to block the Sun's rays from striking the Moon.
