

WHEN WORLDS COLLIDE

1951 PREDICTIVE PROGRAMMING OF THE COMING RED DRAGON 2ND SUN SYSTEM

The purpose of this illustration is to depict the Ending Scene from the 1951 Sci-Fi Movie, When Worlds Collide. It is a story of how the Earth is set on a Collision Course with a Giant Red Dwarf Sun, called Bellus that has 1 Planet revolving its orbit called Zyra. It is this Planet that only a Few Earthlings Escape to, much like in Noah's Flood Story with the Ark. They reach the Planet to start a 'New World Order'. What is astonishing is that upon opening the Space-Ship Hatch, at a distance are 3 Pyramids aligned like Orion's Belt or viewed from Giza on Earth. Then to the left of the 'New Dawn' scene are 2 Pillars and a Rock Formation or a Dragon's Head. The fact that Astronomically, it mirrors the position of where the Dragon Nebula is also to the Left of the Orion 3 Star or Pyramid Pattern cannot be Accidental. That Dragon Head Rock Formation, along with the 2 Obelisks and 3 long Rectangular Etches in the Giant Rock Clip 'Encode' the Mayan Year: 2012. Coincidence? No. The Painted Scene was said to have only been a 'Place Holder' but was left intact due to Budget Constraints. The clear Inference that 'Intelligent' Life made those Structures on Zyra are the same that came to Mars and Earth in Ancient Times to make those same Patterns on Mars and on Earth.

THE BLACK STAR SYSTEM

7-PLANET MINI SOLAR SYSTEM OF NEMESIS

The purpose of this illustration is to suggest some of the supposed known planets of the 7-planet mini solar system of Nemesis. Out of the 7 supposed planets that orbit the Red Dwarf, 3 have ascribed names, Nibiru, Arboda and Helion. Nibiru is by far the most famous and infamous. There is misconception that Nibiru is the Red Planet itself. It is believed that Nibiru is the 3rd from the Nemesis. Nemesis is the more accurate inference of the Red Dwarf or the Red Dragon. Nibiru is more accurately named Herboculus. This is the planet that according to the ancient Sumerian, the Rebel King Ala-lu came to Earth and geo-engineered the Human race. This is the Sumerian version of Creation in *Eridu* with *Adamu*. Also 1 of the 7 planets is believed to have collided in one of the flybys with *Tiamat* to create the Earth and the Moon.

Seen since 2015 by various sky observers throughout the world.
(Heavenly bodies not to scale.)

It is believed that 2 of the 7 planets of the Red Dwarf correspond to the Hopi Prophecy of the Red and Blue *Kachina*. It is believed that such were harbingers of the various flybys of Nemesis since the times of the 1st written records by humans.

A Red Dwarf, also referred as a Black Dwarf is essentially a failed Sun or Star. Such Stars failed to basically ignite and as a result has constricted in size. However, in terms of mass such Stars are massive and as a result functions much like a massive and very powerful magnet. This is why according to some, the possible flyby of Nemesis in the coming few years past Earth could possibly be attributed to the Seal Judgments depictions of the book of Revelation.

NAMES OF PLANET X

- Planet of the Crossing
- Winged Disk
- Horned Planet
- Red Dragon
- Black Sun
- 12th Planet
- Marduk
- The Destroyer
- Great Phoenix
- Lucifer
- Celestial Quetzalcoatl
- Wormwood

THE SUMERIAN SOLAR SYSTEM

The purpose of this illustration is to depict the findings of Karel Donk who has scientifically and mathematically calculated the relative sizes of the famous VA-243 Sumerian scroll. It is entitled the *Granting of the Plow* showing the supposed Solar System of the 12 heavenly sphere with Planet x or Nemesis. According to some, Nemesis is the supposed 2nd binary sun that is a Red Giant Dwarf or failed sun. It has great density and due to its mass and absorption of light, can only really be detected in the infrared light spectrum. What is amazing about this scroll is that is no larger than an inch in diameter and to have such minute intricacies is astonishing. The depiction according to Donk's conclusions is that it is the most accurate rendering of the Solar System although Sitchin, whom made famous the scroll mislabeled some of the spheres. Also, there is a distinction of the Sun encompassed by a trouble tetrahedron as opposed to the motif of Nemesis that is always depicted as a 'cross' motif.

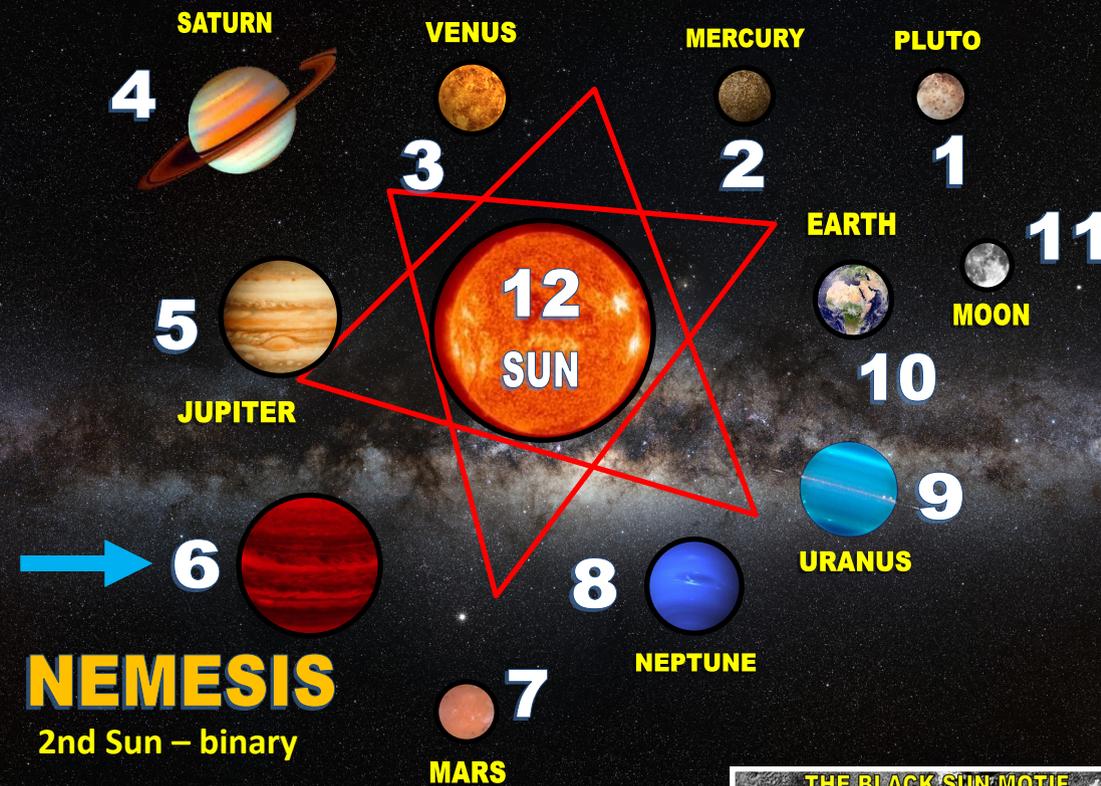

Figure 2

Ancient depiction of Nemesis, as the Winged Disc with horns. It is different from Nibiru. Nibiru is one of the 7 planets believed to orbit the 'Death Star', Nemesis or the Black Sun.

VA-243 Sumerian Scroll made famous by Zecharia Sitchin entitled the *Granting of the Plow* by the Anunnaki to their created humans on Earth.

NEMESIS

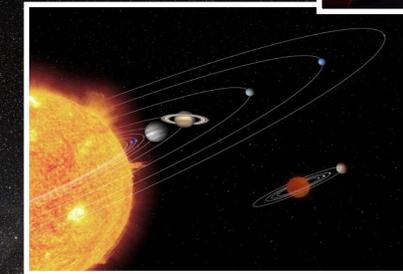

2nd Sun – binary

Many believe that the Swastika derived from this 2nd Sun, deemed the Black Sun, the Death Star, etc., as its various flybys have had cataclysmic effects on Earth and the entire Solar System. Also of note, the position of Nemesis is accurately positioned in-between Jupiter and Mars.

The following are the names associated with Nemesis. There is a confusion and a misnomer as it should be thought as a star or sun in which a planet is famed to orbit it.

- Nibiru
- The 10th Planet
- The 12th Planet
- The 9th Planet
- The Black Sun
- The Destroyer
- The Death Star
- Planet of the Crossing
- The Red Dragon
- Vulcan
- Tyche
- Wormwood
- The Winged Disc
- Hercólibus

In January of 2016, NASA and Cal Tech publicly announced the 'discovery' of 'Planet 9'. This is a disinformation effort to get ahead of the coming flyby and put a spin on the real existence of Planet X.

The depiction of the Solar System, if accurate reveals that the Sumerians knew of the entire Solar System planetary bodies and not just the 5 to 7 that is conjectured that they only knew of. Donk who is from Suriname has a blog that posted his findings at <https://blog.kareldonk.com>. He is a brilliant mathematician, computer scientist and statistician the formulated the relative size of the scroll spheres through the pixilation of the image and used mathematical logarithms to ascertain a comparison of the actually Solar System size of the planets; they match.

Reality			Based on Fig2		
Body	Diameter (KM)	Log10 (S1)	Body	Diameter (pixels)	Log10 (S3)
Pluto	2,306	3.362859303	1	28	1.447158031
Moon	3,473	3.540704783	11	30	1.477121255
Mercury	4,880	3.688419822	2	35	1.544068044
Mars	6,794	3.832125543	7	37	1.568201724
Venus	12,104	4.082928915	3	41	1.612783857
Earth	12,756	4.105714511	10	44	1.643452676
Neptune	49,532	4.694885864	8	53	1.72427587
Uranus	51,118	4.708573854	9	55	1.740362689
Saturn	120,536	5.081116775	4	64	1.806179974
Jupiter	142,984	5.155287442	5	66	1.819543936
Planet X (Nibiru)	226,973	5.355974198	6	76	1.880813592
Sun	1,392,684	6.143852586	12	125	2.096910013

Apparently at the time of the making of the scroll, the Sumerians believed that Pluto was a Planet. They actually started counting the heavenly bodies from the outer edge of the Solar System. Although other planets have moons, only the moon of the Earth is counted, thus there is a total of 12 heavenly objects constituting the Solar System, which as binary one.

THE CIRCUIT OF THE DRAGON

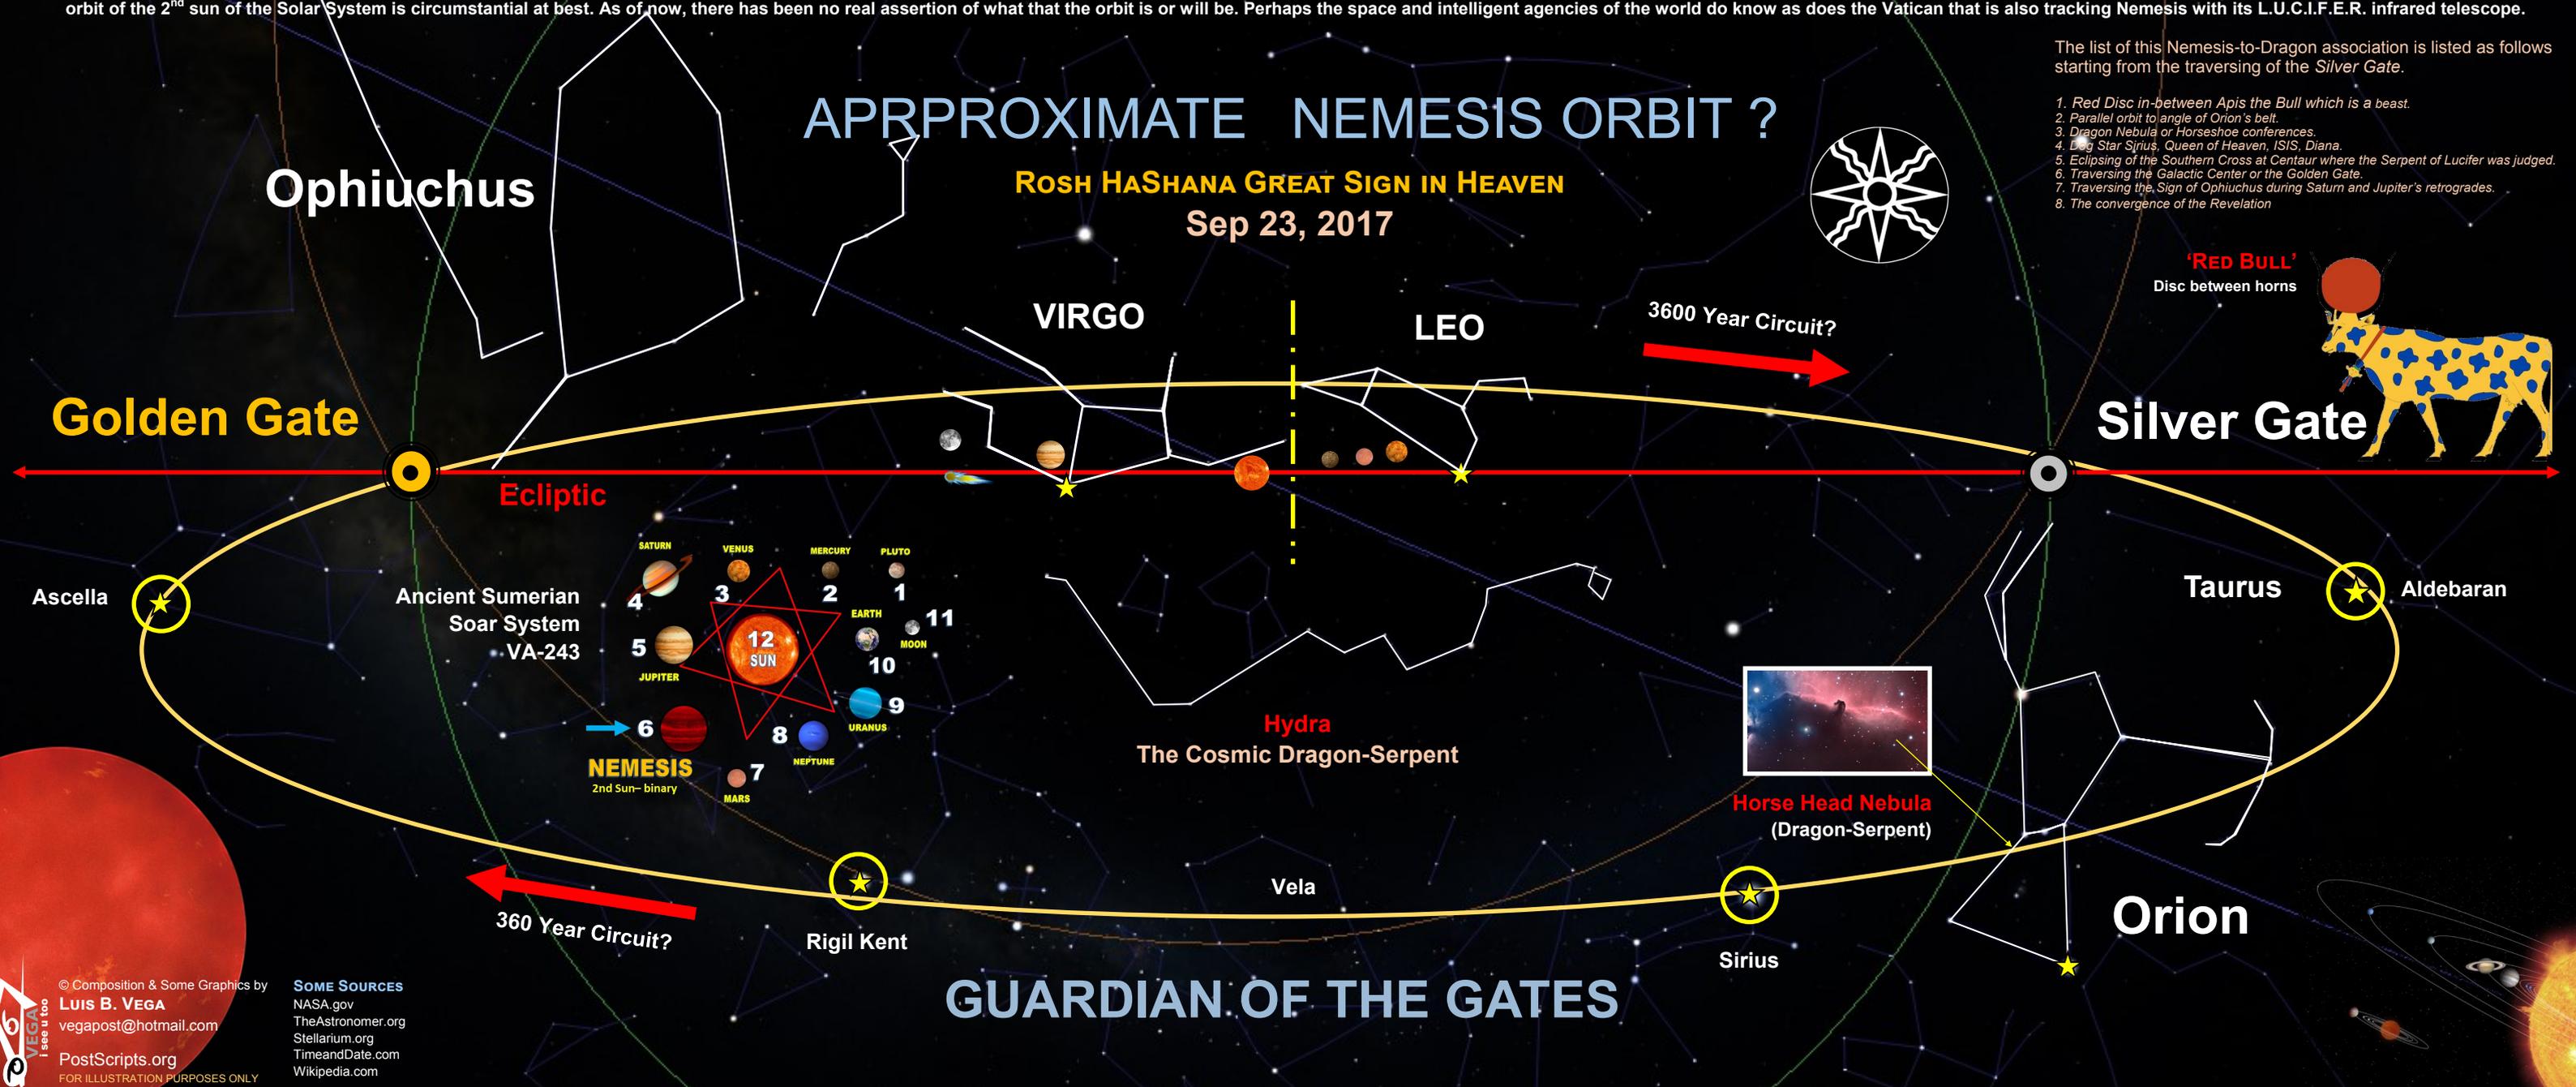

Nemesis is believed to have a 'comet' like elliptical orbit. Based on some models, this 2nd sun has been coming from the region of *Centaurus* and from under the *Ecliptic*. It is supposed to have a counter-clockwise direction from the rest of the planets in the Solar System. Zecharia Sitchin was the first to present the thesis that this Nemesis 2nd sun has a comet-like elliptical orbit around the Sun because it is a binary system of stars. The frequency Sitchin determined was that of a 3600 year or 1 *Shar* duration. Other researchers more recently like that of Gill Broussard has proposed an alternative but compelling orbit of approximately 360 years. This study suggests that the trajectory of Nemesis has a path or trajectory that loops around the *Stargates of the Cosmos*. Based on this assumption, the trajectory model when placed against the zodiac presents a very interesting path. The following is a proposed circuit of Nemesis with its elliptical orbit pattern. The clues will be pieced together like a jigsaw puzzle as only certain pieces of information can be assessed based on what is public information and researched already. The piecing together of what could be the elliptical orbit of the 2nd sun of the Solar System is circumstantial at best. As of now, there has been no real assertion of what that the orbit is or will be. Perhaps the space and intelligent agencies of the world do know as does the Vatican that is also tracking Nemesis with its L.U.C.I.F.E.R. infrared telescope.

The list of this Nemesis-to-Dragon association is listed as follows starting from the traversing of the *Silver Gate*.

1. Red Disc in-between Apis the Bull which is a beast.
2. Parallel orbit to angle of Orion's belt.
3. Dragon Nebula or Horseshoe conferences.
4. Dog Star Sirius, Queen of Heaven, ISIS, Diana.
5. Eclipsing of the Southern Cross at Centaur where the Serpent of Lucifer was judged.
6. Traversing the Galactic Center or the Golden Gate.
7. Traversing the Sign of Ophiuchus during Saturn and Jupiter's retrogrades.
8. The convergence of the Revelation
