

SPECIALTY SKYLIGHTS

Renaissance Conservatories, A division of Advanced Building Products, Inc.

2015

Advantages of working with our company

Advanced Building Products, Inc. is widely known for producing custom specialty skylights with a thoughtful mind to detail. As a custom skylight manufacturer, custom detailed and sized systems are our specialty!

How we work:

Every skylight order starts with a phone call:

Q: What kind of systems can you manufacture?

A: Deck-mount skylights, hipped skylights, over-the-ridge even-span Skylights, and custom glass roofs. Our capability to produce a custom glass roof for any application is virtually limitless.

Q: What are your Lead Times?

A: Our lead times range between 6-8 weeks, depending on the size and complexity of the system.

Design - 25 Pairs of Hands

Our Design Professional's will collaborate with you, the contractor, to design and manufacture a skylight system that will fit your project to the exact specifications you provide!

Custom hipped skylight with clerestory windows

Work Directly with our design team

- Engineered Systems
- Detailed CAD Drawing
- Design Service
- Installation Service
- 10 Year Warranty

Copper clad deck-mount skylight

Deck-mount skylights

Deck mounted skylights are a great way to add light to any room in a house. While you have several companies to choose from that can produce standard sized skylights, Advanced Building Products offers custom solutions such as copper, lead-coated copper, zinc, and custom colored aluminum flashings.

Every custom ordered skylight is manufactured using the highest grade of insulated Low-e glass, which offers the most efficiency of any skylight on the market.

Our skylights are completely clad on the exterior and are shipped as pre-assembled, fully finished systems ready for installation.

Beautiful and ornate hardwood interiors include Genuine Mahogany, Spanish Cedar, White Oak, Red Oak, and Sapele. Other options are available upon request.

Craftsmanship

All of our custom skylights are hand-crafted to fit almost any application. When you call on Advanced Building Products, we ensure that your experience will be a hands-on approach. We will provide shop drawings for you to approve before manufacturing your skylight.

Reward Your Clients

Working with Advanced Building Products, Inc. is a rewarding experience! Your clients will be given a shopping list of alternates for you to present to them during the design stages of the project. Once your clients have selected from a shopping list of custom options, you can leave the rest to us! We have taken the proper steps to ensure a seamless and simple installation process. See the Link titled "Installation Guide" on the next page of this Brochure!

Historical Saltbox home

Copper Skylight Design - Renaissance Conservatories employed 175 pounds of copper to custom manufacture two skylights that sit on the back slope roof. The homeowners, who readily admit that their home is not a mansion, were pleasantly surprised that their smaller sized project was given the same care and attention as a larger one. In fact, Steve Pearson, Program Estimator, stated, "We will take the same care with your two skylights as we do with a \$700,000 solarium placed on top of a Tudor mansion." Now that's true customer service!

Hardwood Interiors

Beautiful Hardwood interiors with concealed steel sub-frames can be stained or painted to match the homes existing millwork.

The concealed steel sub-frames are necessary for the skylight to meet any local wind and snow load building codes in North America.

Skylights shop drawings can be engineered stamped when deemed necessary.

Concealed wire chases are carefully placed, so that a light fixture or fan can be mounted to the skylight ridge.

Hipped Skylight over Residential Library

Hipped Skylights

Hipped skylights can be designed to fit on a flat or even-span roof. For flat roof applications, the sill will be anchored to a flat roof curb.

For even-span roofs, the skylight sill will be designed to span the ridge of the home.

- Highly detailed CAD drawing eliminate the guesswork and provide curb connection details.
- Systems are delivered fully finished and can be crane lifted into place.
- Available with optional motorized awning sash.
- Hand crafted from select grades of beautiful and naturally durable hardwoods
- Trimmed and embellished hardwood interiors with several profiles to choose from.

Adding a skylight to your project has never been so easy!

Introducing natural light to any project is made simple!

Our designers are standing by to assist you in creating a beautiful and unique custom skylight that will bring charm and elegance to your project.

Discover how adding a beautifully unique skylight to your project can be as simple as picking up the phone!
