

# EUROPEAN AI-GOVERNANCE ALLIANCE

Founding Member Opportunity · BlackVault™ Sovereign AI Infrastructure

**20–67×**  
10-year ROI range

**€5–10M**  
Founding investment

**10–14**  
Founding member seats

**EU AI Act**  
Fines active NOW

## What Is the European AI-Governance Alliance?

A SWIFT-model consortium of 10–14 European enterprises that collectively own and govern BlackVault™ — the sovereign AI memory layer for European enterprise. Like SWIFT in banking, it is critical infrastructure that every enterprise needs but no single company should own. It cannot be acquired by US Big Tech. It generates commercial revenue and distributes profits to founding members.

### THE TECHNOLOGY

**BlackVault™ is already built.**  
1,250+ pages of production-ready enterprise code. Assessed: Exceptional – Enterprise Grade.

### THE PROBLEM

**EU AI Act fines are live.**  
Up to €35M or 7% of global revenue. No European-owned zero-transmission solution currently deployed.

### THE WINDOW

**12–18 months remain.**  
Before US platforms fill the governance standard. The first Alliance defines it forever.

## What Founding Membership Gives You

Immediate cost avoidance	50% pricing discount vs. commercial rates — for large-workforce members, capital is recoverable in Year 1–2 through deployment cost savings alone
Profit distributions	Pro-rata share of Alliance Operations Ltd net commercial licensing revenue — beginning when platform reaches profitability
Guardian Council seat	One vote per member regardless of investment size. You shape the European AI governance standard — ahead of regulators, ahead of competitors
Regulatory head start	EU AI Act compliant by design. Founding members deploy first; competitors are still buying compliance tools that audit after the breach
<b>10-year return</b>	<b>20–67× on founding investment — cost avoidance + profit distributions (conservative to optimistic scenarios)</b>

## Why Alliance Rather Than VC-Backed Startup?

A VC-backed startup gets acquired by Microsoft, Google, or Amazon. European data sovereignty infrastructure ends up controlled by the very platforms it was built to provide independence from. The Alliance model — like SWIFT — is owned by its members and cannot be acquired. The mission is protected constitutionally.

## The Anchor Founding Member

**A major European infrastructure company has already committed as Anchor Founding Member — acquiring the BlackVault™ IP and leading the Alliance. The technology is being built. The founding group is forming now.**

## The Valle Constitucional Ecosystem

Málaga TechPark	Co-founder. Gateway to 600+ member companies including Telefónica, Indra, IBM, Accenture.
Universidad de Málaga	Co-founder. Academic validation, AI governance research, talent pipeline.
AIR-Andalucía (EDIH)	EU Digital Innovation Hub. Bridge to EU Commission and structural funds.
Junta de Andalucía	Regional government support. Andalusian AI strategy alignment.

**Only 10–14 founding member seats are available. Seats are allocated in order of commitment. Request the full Founding Member Invitation to proceed.**
