

# Stucco Retro<sup>TM</sup>

## Foreword

Stucco Retro<sup>TM</sup> is a program written by Dominic Berretta for Stucco Retro of West TN Inc. The Stucco, Synthetic Stucco Inspection Repair and Maintenance Program is copy written as are the terms and forms contained in the Stucco Retro<sup>TM</sup> Program. Law shall prohibit any misuse or unauthorized use of these documents.

The Stucco Retro<sup>TM</sup> is specifically designed to address the issues of concern dealing with stucco and synthetic stucco exterior claddings.

Stucco Retro<sup>TM</sup> does this by presenting a set of inspections, field test and a comprehensive repair specification to ensure the performance of your exterior finish system.

For this program to succeed, Stucco Retro of West TN Inc. has adopted the following posture in regard to certain facts dealing with stucco and synthetic stucco.

- Any repairs performed under this program must be inspected to make sure they are completed as specified. This important factor has been missing from the installation process. To insure the quality of the program, inspections and the verification of these inspections are a necessary part of the Stucco Retro<sup>TM</sup> program.

The inspectors performing the work shall be trained by Exterior Design Institute, Stucco Retro of West TN, Inc., or a training program approved by Stucco Retro of West TN, Inc.

Stucco Retro of West TN certifies that the Operator of the Stucco Retro<sup>TM</sup> Program in West Tennessee has been trained and certified by Stucco Retro of West TN, Inc. as an Operator and that its officers are Exterior Design Institute certified.
