

***Trouble Shooting Guide For Common Problems With A Below Knee Prosthesis***

**Discontinue to wear the prosthesis and contact your prosthetist for an appointment. Your prosthesis may need an adjustment by your prosthetist if unable to discontinue use, use an assist such as a walker to reduce weight on the prosthesis, and discontinue use as soon as possible. If you suspect that you are having a medical emergency, contact your doctor or call 911 for assistance**
