

Adult Taekwondo Testimonial

“I decided to look into Martial Arts so that my son and I could do something together and I really wanted to get in better shape. I never thought that 2 years later I would be a 1st degree Black Belt in Taekwondo. I had looked into other schools and just never really got “excited” about them. Ms. Bushey and Mr. Smail have this amazing partnership and that really creates a positive and fun atmosphere no matter your age or reason for coming. After just one class with Ms. Bushey and Mr. Smail my son and I were hooked. That’s not easy to do with a teenage boy who’d rather hang with friends. It was structured for a great learning experience but the best part was they made it fun, interesting, and “real”. I saw that they were also teaching important lessons like respect and responsibility and that was important to me. I wanted my son to learn Taekwondo but also when it was appropriate. Both Ms. Bushey and Mr. Smail always provided support and encouragement while making sure I understood my part in my own success. After having learned so much from them I wanted to give back and share this amazing experience with others. I am able to do that today by being a part of the Leadership Program. The Leadership Program gives us the opportunity to help make ourselves better leaders, teachers, and to help others. I have no regrets except that I didn’t find them sooner.”
