

What is **A.S.K.**?

So what is A.S.K. in What If? Just A.S.K.. The **A.S.K.** is the methodology developed by Breanne E. Brooks and Rodney D. Brooks and it is geared toward helping our youth build the tools that can be an asset in building their careers. The simple yet profound process allows individuals to begin **A**sking the right questions, **S**eeking the answers and utilizing resources. Most of all it encourages people to accurately **K**now, assess and believe in their abilities. This valuable tool/methodology teaches self-confidence and **critical thinking skills** to young people who are looking for reliable, practical guidance as they step out in the wider world.

Today we have some of the smartest and creative Youth that has ever been known to mankind. From science and technology to entertainment and literature, our young people have blazed trails that had not been explored before. The purpose of the What If? Just A.S.K. products are to engage and ensure our youth have the opportunities to reach their full potential. Our Products consist of the following:

1)What If? Just A.S.K. book, 2) The W.I.?J.A –What If? Just A.S.K. Website, 3) The W.I.? J.A.-NNECT Career Center and 4)W.I?J.A. Toolkit (Which will be in APP form soon) For more information on products

Critical Thinking

<https://www.whatifjustask.com>

What is Critical Thinking?

Critical thinking means making reasoned judgments that are logical and well-thought out. It is a way of thinking in which you don't simply accept all arguments and conclusions you are exposed to but rather have an attitude involving questioning such arguments and conclusions. It requires wanting to see what evidence is involved to support a particular argument or conclusion. People who use critical thinking are the ones who say things such as, 'How do you know that? Is this conclusion based on evidence or gut feelings?' and 'Are there alternative possibilities when given new pieces of information? Visit our website at <https://www.whatifjustask.com> for more information.

How important is Critical Thinking?

Critical thinking is important in all aspects of life. It is critical to science because science only progresses, in the simplest terms, by uncovering the patterns underlying the materials and processes of nature. It is important to each of us because it is the mechanism that drives us to change, improve, and influence all aspects of life. If we did not ask the why or what if questions then things would remain the same. We would all memorize the things we are taught and take them at face value. There would be no inventions, no one going into space, no improvements in our food supply, no technology, no improvement in health and science, etc. Critical Thinking is key to our survival.

Careers that require Critical Thinking Skills

Critical thinking is a key skill desired by many employers. It's the ability to use intensive thought processes to thoroughly analyze questions or situations. Critical thinkers go beyond initial perceptions and take into account the perspective of others as well as their own. While a wide array of jobs can be better performed by a critical thinker, this ability is necessary in some positions such as:

Judges, Teachers, Doctors, Managers, Engineers, Biologist, Lawyers, Psychiatrist, Astronomer, Explorers, Airline Pilots, Coaches,
