

Monitoring Violations Annual Notice Template

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Monitoring Requirements Not Met for [Park City]

Our water system violated several drinking water standards over the past year. Even though these were not emergencies, as our customers, you have a right to know what happened and what we did to correct these situations.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During [1/1/2022 – 12/31/2023] we [failed to provide you, our drinking water customers, and annual report that adequately informed you about the quality of our drinking water and the risks from exposure to contaminants detected in our drinking water. Specifically, the source water table was inadvertently omitted] and therefore cannot be sure of the quality of our drinking water during that time.

What should I do?

There is nothing you need to do at this time.

There is nothing that you need to do at this time. A corrected Consumer Confidence Report (CCR) was submitted to the EPA for the compliance monitoring period of calendar year 2022. The report was reissued as required with all necessary corrections and our supply has been returned to compliance.

Contaminant	Required sampling frequency	Number of samples taken	When all samples should have been taken	When samples were or will be taken
[N/A]	[Number of required samples]	[Number taken, if any]	[Compliance Period]	[When samples were or will be taken]

What happened? Failed to include the source water table in the 2022 CCR. What is being done? Reissued the 2022 CCR with all necessary corrections.

[Reissue the 2022 CCR]
