Tomatis Protocols & Pricing

Tomatis Listening Therapy consists of listening to specially-programmed music through bone conduction headphones for 80 minutes per day for 14 consecutive days. This 14-day session is called an “Intensive”. Once the Intensive is completed, the client takes a 4-6 week break in order for the brain and body to assimilate the changes that were implemented by the sound therapy. A *minimum* of three (3) Intensives is recommended for permanent change/development/improvement. Each client is unique, and some require more Intensives than others. I offer a reduction in fees for Intensive 4 and up.

Prior to each Intensive, the client will complete an assessment which consists of an evaluation that will be sent to your email with a link that connects you to the Tomatis Questionnaire. Additionally, for clients aged 7 and older, there is a listening assessment that is done in my studio. The equipment and process are similar to that of an audiologist, and it takes approximately 45 minutes to complete.

The pricing for each Intensive is as follows:

Assessments and analysis:	\$100.00
Intensive (programming and equipment use):	\$600.00

Shipping and insurance (required) is additional for out-of-area clients.
