

LSSGB & LSSBB CERTIFICATIONS

Lean Six Sigma Belt Certifications

Lean Six Sigma is the blending of Lean and Six Sigma methodologies. Lean addresses customer value and reduction of waste. Six Sigma focuses on variation reduction and statistical measurement and controls. CEO Jerry M. Wright is a Certified Master Black Belt and has trained and certified more than 750 people in Lean Six Sigma. His instruction style is fun, and students enjoy his hands-on exercises and simulations.

LEANwRIGHT LSS Green Belt – 4.5 full days or 45 hours plus project time

Prerequisite(s): None

Description: This class provides an intermediate level of Lean Six Sigma (LSS) with in-depth coverage of the LSS tools and concepts. Class includes videos, exercises and multiple simulations to reinforce the concepts presented. Students receive complete binder with LSSGB materials including in the cost of the class. Each student must pass a 50-question exam on LSS and then complete LSS project to be certified. Projects (or a Kaizen Event) are expected to have cost improvements of at least \$25,000 per year. Qualified projects typically need to be presented within 3-4 months of training completion to receive certification.

LEANwRIGHT LSS Black Belt – 4.5 full days or 45 hours plus project time

Prerequisite(s): LEANwRIGHT LSS Green Belt or Equivalent LSSGB Certification

Description: This class provides an advanced level of Lean Six Sigma (LSS) with in-depth coverage of the LSS tools and concepts. Focus is more on inferential statistics, Design of Experiments (DOE), Quality Tools, Improvement Kata and leadership of LSS and mentoring of lower rank LSS Belts. Class includes videos, exercises and multiple simulations to reinforce the concepts presented. Students receive complete binder with LSSBB materials included in the cost of the class. Each student must pass a 100-question exam on LSS and then complete LSS project to be certified. Projects (or multiple Kaizen Events) are expected to have savings of \$100,000 per year. Qualified projects typically need to be presented within 4-6 months of training completion to receive certification.
