the power of instant communication

Jasper County, IL E-911

Keeping you informed is a top priority in Jasper County. That's why the county has adopted a new notification service which will allow telephone messages to be sent to you providing information about weather related announcements, road closings, evacuations, and many other emergency situations. The county anticipates using this service to notify you in an emergency situation. In the event of an emergency in Jasper County, you will be informed immediately by telephone.

The successful delivery of information is dependent upon accurate contact information for each resident, so please make certain that your most current landline/cell phone numbers and address is updated should you move so that any Emergency Alerts affecting only your immediate area will reach you.

Hyper-Reach will automatically call your listed landline number. You need to sign up for any unlisted landline number or cell number. If you have a cell phone, sign up for Hyper-Reach notifications so you will have the ability to receive voice notifications. It is understood the data roll over from Code Red brought cell phone numbers over but notifications will be only sent via text message to cell phones until you sign up. By signing up you have the option to pick voice, text, and/or voice/text and to choose your weather options.

Registering the additional information with the Community Alerts option will allow your phone, email, and/or TDD to be notified for local emergencies and community alerts as well, such as city residents affected by a boil order, road closure, water main break, etc.
