Scott Burghardt is the Vice President and Director of Operations for the Concrete Preservation Institute. He holds a Bachelor of Science degree in Construction Management from California State University, Chico, and is completing a specialized Master's Degree in Historical Concrete: Analysis, Justification, and Repair. With extensive experience in building materials and systems, Burghardt has been a licensed general contractor in the State of California since 2008. As an instructor at California State University, Chico, in the College of Engineering for the Concrete Industry Management Program from 2012-2016, his commitment was preparing students for the challenges of transitioning into industry careers. Burghardt's selected research has included concrete durability analysis with SIMCO, feasibility studies for implementing NASA CO₂ reduction technology for the cement industry, and custom concrete mix designs for historical structures with the National Park Service. Selected projects include preservation of the 100-year-old *Red Barn* in the Tennessee Valley of California's Marin Headlands and evaluation, preservation, and continuous stewardship of landmark structures on Alcatraz Island, at Pearl Harbor and other historic sites in Hawaii, and at WWII battlefields on the Pacific Island of Peleliu.
