IM1500

Ice and Water Vending Machine

Intertek

NAMA
LISTED

The IM1500 PROVIDES BIG PRODUCTION

The new IM1500 was designed using years of research and development. The IM1500 offers outstanding technology designed to maximize efficiencies in ice production and ice storage while reducing both electric and water costs. The IM1500 is a perfect blend of production, price and performance - setting a new standard in the ice vending industry.

• BIG PRODUCTION

The IM1500 can be equipped with one or two icemakers. This means you can **expand the production capabilities** of the machine in the field as your ice business grows. The second icemaker can be added in the factory or in the field in less than four hours. Each icemaker can function independently, allowing the owner to operate one or two icemakers depending upon the volume requirements of the operating season.

• INNOVATIVE BIN DESIGN

The IM1500 holds up to 1500lbs of ice in its 2" thick, double walled, insulated ice storage bin. Like a high-end cooler's construction, this tightly sealed bin is easy to clean as compared to a stainless steel bin design. Additionally, the machine requires no refrigeration. This means **lower utility costs** when compared to other ice vending machines.

• WATER VENDING

The IM1500 can be equipped with an optional Water Vending Station to add a **secondary income source** to your machine. It features a commercial grade reverse osmosis filtration system or a standard filtration system, dependent upon your water quality. Water vending is an efficient and inexpensive way to increase revenue and profits by allowing your customers to fill 1 gallon and 5 gallon bottles with fresh filtered water.

• CASHLESS VENDING

The IM1500 can be equipped with a credit card reader that will take debit, credit, Apple Pay and Android pay. Kooler Ice free vend coupons are also available to market the machine and help with special promotions. In the event your customers want to use cash, the IM1500 can take quarters, dimes, nickels and one and five dollar bills.

“ A Perfect Blend of Production, Price and Performance. ”

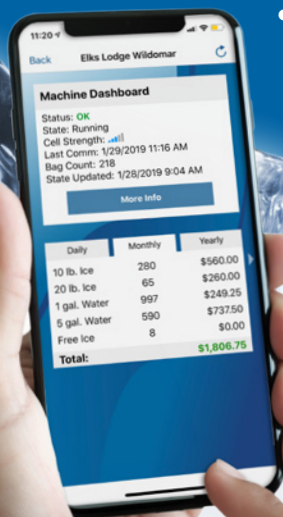

Leaders in Innovation and in Technology

The IM1500 features the industry leading Kooler Ice “IceTalk” remote monitoring system. With this proprietary system, owners can:

- Remotely manage their machines with a smartphone app, laptop or desktop.
- Place the machine in free vend mode, reset the bill validator and turn the unit on or off remotely.
- Keep track of how much money is in the machine at all times.
- Pull numerous sales reports including daily, weekly and monthly reports from phone or desktop.
- Remotely monitor the Scotsman Ice Maker for alerts and cycle time.

IceTalk monitors over 20 different systems to keep you in the loop with your machine at all times.

“Work Smarter – Not Harder” with the IceTalk Remote Monitoring System.

BIG INNOVATION WITH LOW OPERATING COSTS

- **TARGET MARKET PRODUCTION & CAPACITY**

The IM1500 is the perfect stand alone machine. The unit was designed to provide big production with a reduced footprint and will easily fit in one parking space requiring less than 50 sq. feet to place the unit. With a 1500lb. Ice storage bin and the ability to add 1 or 2 ice makers, the IM1500 will meet most production requirements.

# of C1848 Ice Makers	Max 24hr Production	Maximum 10lb. Production*	Storage Bin Capacity	Unit Width	Unit Depth	Unit Height
1	1909 lbs*	190+ Bags **	1500 lbs	5'9"	7'10"	10'5"
2	3818 lbs*	250+ Bags **	1500 lbs	5'9"	7'10"	10'5"

*Max Production at 70 Degree Air / 50 Degree Water per Scotsman Spec Sheet ** Max Bags assumes full bin + 12 hours production

- **SIEMENS ELECTRONICS WITH PLUG AND PLAY WIRING HARNESS**

All Kooler Ice machines use industry leading Siemens electronics, PLC's, contactors and breakers. Heavy duty wiring harnesses are all labeled and fitted with Deutsch type connectors to enable quick removal and easy replacement when service is required. In most cases these adjustments are simple enough that a trained technician is not required.

- **WORLD CLASS SUPPORT**

1-800 Service hotline – Our service hotline is available 12 hours a day every day of the year and staffed with highly trained service technicians to answer your questions on the spot! The 1-800 line is open every day of the year.

Maintenance - We are here to help! If you want us to do the maintenance on your machine, just call the 1-800 line and ask to schedule an appointment with an approved Kooler Ice representative. If you want to do your own maintenance, we will provide you with the steps to do it yourself.

On-line Parts Store - Need a filter, part or promotion item? You can browse our online parts store when it is convenient for you, day or night.

Site Analysis - Need help in picking your location, or reviewing your site? Our sales team is very well versed in the site selection process. We utilize various metrics and demographics to assist you in grading and reviewing sites.

Marketing and Promotion – Our in-house marketing team can provide you with the tools you need to promote your machine on site or through social media. Start building your business before your machine even arrives on site.

- **CERTIFICATIONS TO PROTECT YOU AND YOUR CUSTOMERS**

NAMA Listed – The IM1500 has been tested by NAMA and complies with the latest Federal Guidelines for sanitation and safety for ice and water vending machines. This certification is important and is required by the Agriculture Departments of many states.

UL Listed – The IM1500 has been tested against the latest electrical and safety standards under UL 541. When applying for permits the UL listing is very important. When reviewing UL listings, make sure the entire machine carries the UL listing, not just the icemaker.

ADA - All Kooler Ice machines meet the latest American's with Disability requirements. Many cities are enforcing this act and require vending machine operators to comply with the latest ADA requirements.

- **CLEAN, EYE-CATCHING APPEARANCE**

The IM1500 was designed to be used in stand-alone applications such as open areas or parking lots. It's physical presence is eye-catching with a fitted canopy to cover the ice makers so the machine has a sharp, finished look and appearance that customers will find attractive and inviting.

Optional LED lights are available to brighten the machine at night, providing a very visible, well lit machine that will make customers feel safe and increase night time sales.

- **COLD WEATHER OPERATION**

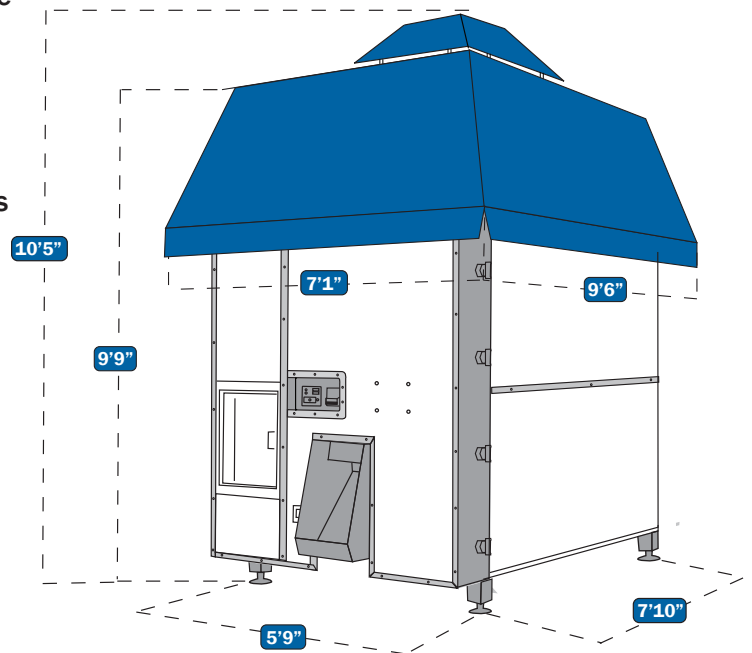

The IM1500 can be equipped with 2 different packages for cold weather operation. A heater with thermostat provides heat inside of the machine. A cold weather package is available for the ice maker for even colder climates.

Machine Features:

- Features one Scotsman C1848 Prodigy Ice Maker (Rated at 1909lbs of Ice in 24 Hours)
- Additional Icemaker may be added to Increase Production
- 2" Thick Double Walled, Insulated Ice Storage Bin
- 1500lbs of Ice Storage Capacity
- 220 Volt Single Phase Power, 100 Amp Service
- 3/4" Water Supply Line with 2" Drain-line
- High Strength, Corrosion Free, Aluminum Alloy Frame
- ICE TALK Communication System
- Siemens Electronics and Cellular Modem
- Eye-Catching High Gloss Lexan Graphics
- Compact Design with Easy Access to All Components
- Easy Bag Changing System - Holds up to 500 Bags
- Unique Bag Tracking System for Consumer Safety
- Adjustable Vend Rate (from \$.05 to \$99.95)
- MEI Extended Bill Cartridge – Holds up to 750 Bills
- Multiple Volume Vending Options
- 10lb. / 20lb. or 16lb./32lb. buttons available

Machine Options:

- 1 and 5 Gallon Water Vending Station
- Filtered or Reverse Osmosis Filtration System
- Credit / Debit Card Reader
- Light Kit Available on 1-4 Sides
- Cold Weather Package for the Ice Maker
- Heater with Thermostat
- Bollards

Machine Weight – Approximately 2,450 lbs.

Because the Kooler Ice machines produce ice on site, the need for an ice delivery truck is eliminated, therefore reducing the “carbon foot print”. **Our machines help protect the environment** while providing a safer, more convenient, higher quality product than what is available through today’s packaged ice
