

Name _____

Date _____

1. Estimate the partial quotients as you divide. The first estimate is started for you. Make as many estimates as needed. Then check your work.

$$6,743 \div 21$$

2	1)	6,	7	4	3

Estimates:

$$6,000 \div 20 = \underline{\quad}$$

Check:

$$6,743 = \underline{\quad} \times 21 + \underline{\quad}$$

Quotient: _____ Remainder: _____

2. Divide. Then check your work.

$$1,687 \div 33$$

Check:

Quotient: _____ Remainder: _____
