 E-Mail Address:

Results are usually available the next business day after we receive the sample. We can call, e-mail or fax preliminary results or you are welcome to call anytime.

The cost for Bird Sexing is \$20 per sample. The submitter is responsible for payment and payment must accompany sample unless previous arrangements have been made.

Same Day Results are now available for an extra fee. Please call for details.

Payment Method (please circle one): Check, money order, credit card, invoice

Please Note: In the event that a submitted sample does not contain sufficient DNA for processing Bird Sexing Solutions will test another sample from the same bird at no charge. Refunds or credits will not be issued for samples with insufficient DNA. In no event shall Bird Sexing Solutions be liable for incidental, consequential, special or other damages of any nature even if Bird Sexing Solutions has been advised of the possibility of such damages.

Instructions for sample collection:

Blood: Blood samples are commonly obtained by clipping the toenail too short. An alternative is to use a lancet like the ones that diabetics use to check their blood sugar. A good place to lance is on the feet between the toes. If you see a vein that is a good place to start. With either collection method, you can preserve the blood by placing it directly onto the orderform, letting it dry and covering it with clear tape or by blotting the blood with a Qtip, and letting it dry. Submit the sample with an orderform.

Eggshell: Let the shell dry completely, seal each shell in a separate container or bag and send it along with an order form.

Feathers: Submit 4-5 FRESHLY PLUCKED feathers. Molted feathers do not yield enough DNA for testing and will not be processed.
