1

## Choose Setup

Select a hydroponic system suited to your space and needs, such as a Kratky, DWC, or NFT system.

2

## Select Medium

Decide on a growing medium like perlite, vermiculite, or coconut coir to support your plants without soil.

3

## Provide Nutrients

Mix a hydroponic nutrient solution according to plant needs and water your plants regularly with it.

4

## Monitor Environment

Keep an eye on factors like pH levels, temperature, and light exposure to ensure optimal growth conditions.

5

## Harvest and Enjoy

When your plants reach maturity, harvest them and savor the fruits of your hydroponic labor.

**When: Sat. May 10th**  
**10 am to 12 pm**  
**\$40.00**

**Where: First Spiritual Science Church**  
**3375 S Dahlia St**  
**Denver, 80222**
