

'HAND OF GOD' JAMES WEBB IMAGE

The purpose of this illustration is to depict the location of the Image from the James Webb Telescope released on October 25, 2022, the Day of the Solar Eclipse. Why this is potentially Prophetic is that the Eclipse's Pair, the Blood Moon Lunar Eclipse happens on November 8, 2022. And this Blood Moon occurs in the Constellation of Cetus. This is where the NASA Image is situated of the Double Galaxies that are merging and one interprets it as depicting the 'Hand of GOD' with an Open Palm. Based on Biblical Astronomy, the Time and Location of the Blood Moon, and release of the Image on its corresponding Solar Eclipse suggest a Rapture Typology based on the Sign of Pisces and Cetus. The Prophetic Innuendo is that Christ Jesus is the only one that can come to loosen the Band or Chord that Mutually Intertwine the Fish, that is a Motif of the Believers in Christ Jesus and the Sea Dragon that is the Motif for Lucifer.
