

RUNK MISSION HAITI

WELL DRILLING

"I have been praying about this for 3 years but the enemy keeps whispering in my ear. . . 'You can't do this... people will stop supporting you if you ask to raise this much money.' But now we MUST prove the enemy wrong! This is a GOD sized task. But God commanded us to care for the least of these and this is doing so on the most basic of areas. Doesn't everyone deserve safe, clean water?"

-Nicky Runk, Missionary in TiTanyen, Haiti

I have been blessed to borrow the machine pictured to the left over the past three years, when it wasn't broken down. This rig has been in Haiti for 37 years. We spend as much time repairing and waiting on parts as drilling. But now it isn't available at all. Still, we were able to drill 20 good wells with it. But just think what could be done with a dependable rig that is always available! We are hoping to purchase a much newer version of the same rig, (shown in the picture to the right.)

It will take God raising up an army to help us raise enough money for this equipment. Haiti is in the fourth year of drought and many wells have dried up. The need to dig deeper wells, and in new areas is staggering. So many people and animals are drinking unclean water. Disease and cholera are rampant.

I have been praying, and now the Lord has given me the opportunity to share this vision with you. Would you please pray with me and consider giving towards this new well machine?

Just imagine the GOOD news that is shared when good water is supplied through a new or repaired well! It is a picture of what Christ does as He restores our soul!

TO DONATE: Checks can be made out and mailed to: Global Outreach International
(Please mark account # 3379 in memo) P.O. Box 1
Tupelo, MS 38802
