WEIGHT LOSS

Lap-Band

Certified by the FDA in the treatment of obesity. "Our professional medical and support teams at South Pacific Surgery Centers are active in your weight-loss journey. Some of our staff have struggled with their own over-weight/obesity issues in the past, and their experiences are reflected in their compassion and drive to see you succeed. Our surgeons understand that this life-changing decision comes with great rewards. Being overweight brings physical and emotional problems but are they are reversible and Lap Band

Patients who have had Lap Band report an improved life on every level from physical, mental to emotional. Women and men struggle with overweight/obesity for years before seeking various weight loss options available. Why wait until poor health caused by obesity makes the choice for you. We can help you right now achieve your best look."

PLASTIC SURGERY

Cosmetic Makeovers

"What some refer to as lunch-time cosmetic treatments are increasing anti-aging options. Our team of plastic surgeons/cosmetic specialists work with patients to achieve their desired look. Peels reduce age spots, fine lines, scars, wrinkles; Dermal injectables and laser restore a more youthful appearance to the face, hands and neck, remove unwanted tattoos, age spots, scars and unwanted hair. Body makeovers such as arm/thigh/breast/buttock implants, lifts and reductions give our patients a new lease on their lives as they move forward proud of the improvements they see."

"Nobody looks forward to having surgery, whether it's for a cosmetic procedure or to finally address a health concern that is causing stress and body breakdown. But surgery doesn't have to be upsetting. At South Pacific Surgery Centers our main priority is patient care, and our team of experienced physicians, nurses and staff offer cutting-edge treatments in an efficient and caring environment to make your surgery as comfortable as possible. I've worked in the medical field for more than 20 years as Operations Manager at my medical facilities and we have helped thousands of patients achieve not only their best look but their best in optimal health."

— Simin Hashemizadeh

surgery can eliminate or lessen the medical conditions associated with being overweight and obese such as Diabetes, heart disease, osteoarthritis, hypertension, stroke, liver and gallbladder diseases, sleep apnea, many respiratory issues, and certainly the need for daily medication usage. The Lap Band procedure is accomplished utilizing a fast, reliable, simple, laparoscopic technique.
