

Office in the Cloud for Architecture, Engineering and Construction Firms

Essential IT services for communication, collaboration, mobility and document sharing that make project workers more productive in a high-value, bundled plan that increases our value. We offer the right solutions to address your email, voice, mobility, security and file sharing needs.

Audited security controls including SOC 2 Type II

Mobile device management to protect data wherever it is accessed

Admin tools to streamline IT management and security

Reliability and support with a 99.999% uptime guarantee

Would you like to pursue profitability?

We can help you understand what your business probably needs to succeed and how to make it all work securely.

Challenges

Strengths

Complex projects with many stakeholders

Project teams are highly cross functional, and include external parties

Collaboration + Hosted PBX Plan

Powerful collaboration tools that work well with external users, mobile users and large files

Highly cyclical workloads

Projects ramp up and down quickly

One stop shop

Single provider for Services - easy to scale up and down as resources change

Low IT expertise

Few dedicated IT resources available for project teams

Worry-free

7/24 support, single control panel makes it easy to manage services, set up, add/remove users and services

Core services for your AEC firm.

Hosted Exchange

Business-grade, fully mobile email, calendar and contacts with unlimited email storage to all employees, so the team stays connected and productive.

Hosted PBX

Experience enterprise-grade phone service with conference calling and automatic call forwarding. Use the softphone mobile app to dial from a mobile device as if you were sitting at your desk. (FREE Cisco or Polycom IP phone)

McAfee Email Defense Suite

Get comprehensive email protection from a global leader in IT security. Includes McAfee Advanced Email Protection, McAfee Data Loss Prevention and McAfee Email Continuity. (Included with every account)

Skype® for Business Enterprise

Instantly convert a chat into a conversation or video for richer, more productive project discussions. Share screens to collaborate quickly on proposals.

ShareSync backup and file sharing - Starting at 10GB per person capacity

Share designs, specifications, change orders and project documents more easily with secure access and file sharing from any device, anywhere. Get at-rest and in-transit encryption with strict controls over file access. Capacity of 10GB to 1TB per user pooled across all users.

ApplD single sign-on and identity management

Create a single point of access for your web apps, including scheduling and project management services with 2-Factor Authentication, the strongest industry-standard authentication protocol. Simplify access and support for your users and administrators to save time and boost productivity.

PC Backup

Make sure your staff can recover quickly from hard drive failures and lost or stolen laptops.

Outlook Backup

Gives admins full control over data that's stored in a users' Outlook client – including locally stored data that doesn't get updated to the exchange server.
