

Product Data Sheet COOLING WATER TREATMENT CT-1600M

DESCRIPTION

CT-1600M concentrated liquid cooling water treatment. CT-1600M is a blend of organic and inorganic inhibitors, formulated with synthetic dispersants that control corrosion, while keeping heat transfer surfaces free of insoluble materials.

APPLICATION

CT-1600M was developed to be used as a concentrated alkaline treatment program with superior results under severe conditions. CT-1600M contains a molybdate tracer and corrosion inhibitor for easy testing.

PHYSICAL PROPERTIES

Color & Form.....Dark Amber liquid
Specific Gravity 1.283
Density 10.697 lbs./gal.
pH..... 13.18
Odor Sweet Aromatic

DOSAGE & FEEDING

Your Clear Water Technologies representative will make specific dosage and feeding recommendations.

HANDLING & PRECAUTIONS

CT-1600M should be handled as any strongly alkaline material. Use chemical goggles, rubber gloves, protective coveralls, rubber boots, and apron if spills are likely. Do not get in eyes, on skin, or on clothing. Flush thoroughly with large quantities of water upon contact. Obtain medical attention if the product contacts the skin or eyes.

Review the Material Safety Data Sheet for additional safety issues.

Keep container closed when not in use.

PACKAGING

CT-1600M liquid is available in:

5-gallon pailsnet wt. 50 lbs.
30-gallon drumsnet wt. 315 lbs.
55-gallon drumsnet wt. 600 lbs.
