Resort & Golf Course
Summer Updates

August 2019

Busch Hall is starting to look brand new. Everyone will be amazed how beautiful the new floor is. The floor also makes the building safer, there are no cracks or chipped tile that could cause a fall.

Wow! Who will be the first to use the new laundry room. It is beginning to look like a pleasant place to spend while doing your laundry.

New roadways on *Golf View* will make coming and going much easier for our parkers and our guests.

Every site on *Golf View* now has its own electric and water on the proper side of the rig. A private patio and a convertible bench/table can be enjoyed by winter guests.

Private and handicapped parking for bocce ball players. A pleasant area for one of our favorite activities, day and night.

Equipment used for tearing up the roads and repaving.

Looking at the road going into storage prior to repaving.

Wow. A smooth ride to park your trailer or boat

Increased storage will allow more storage for the increase in packages received.

The pictures in this update do not begin to show all the work going on this summer. Everyone, maintenance and office staff, have been extremely busy this summer. You will be pleasantly surprised to see all of the completed projects, the new activity building ready to use, the woodshop awaiting the equipment to be moved and the new office ready to greet you. There is still work to be done, the office needs shutters, they have been ordered; the office needs landscaping, but all good things come to those who wait, just to name a few.

Hope you all have had a great summer and are looking forward to returning to TR.
