

# SPRAYERS & ACCESSORIES CATALOG

Serving the farm and ranch industry since 1963

SMVINDUSTRIES.COM

SMV Industries was founded in 1963 after a national mandate requiring the use of the slow moving vehicle sign. In the beginning one employee made the signs that were sold in the farm retail market. As sales increased, more and more employees were hired and new products added to the SMV line of merchandise.

Offering light manufacturing, warehousing, and distribution to farm/ag/home store retailers. Conveniently located in the Interstate 29 & Interstate 80 corridor in Council Bluffs, IA. We have over 40 years of experience in the Lawn/Garden/Ag Sprayer market with 125,000 sq. ft. warehouse space.

SMV Industries stands out as a company known for its long-term commitments, reliable service, quality products, and competitive pricing. The SMV name brings with it a reputation for integrity. Customers can believe what they are told. As a family-owned business, SMV focuses its attention on managing business over the long term to ensure a significant presence in the marketplace. Customers can rely on SMV's merchandising, warehousing, and distribution system to help them stay competitive in meeting the product and service demands of their customers.

SMV employees are a multi-talented group of people who sincerely care about the products they make and customers they serve. They are hard working people who still believe in old fashioned, midwestern values and service – with a personal touch. We look forward to serving and helping you meet your needs.

FATBOY

SMOOTHFLO

Remco Professional Grade quality starts with our vision to produce fluid handling equipment that excels in performance and reliability, and surpasses the end user's expectations. Every component of every Remco product has earned its pedigree through relentless field use and refinement.

Remco takes nothing for granted. Every product is tested at the factory to ensure it meets our rigorous standards of quality and performance.

Industry professionals choose Remco first because of our commitment to pro-level quality, engineering and customer service.

At TeeJet Technologies our single focus is on application technology. Our company and our products have been part of agricultural applications since the first crop protection products came onto the market in the 1940's. Our control systems date back to some of the earliest in-field uses of electronics in agriculture. This experience in the fields of spraying, fertilizing, and seeding means nobody is better suited to provide quality products and technical solutions for your business.

Innovative, industry-leading products are what you expect from TeeJet. Many of our best solutions can be found in our catalog or on this website; however, there is more to our company than great products. We also possess a wealth of information about applications and technologies that don't appear as cataloged products.
