

Nerve Glide Techniques

September 16, 2022

Friday 9 am - 6 pm (8 hours)

\$160 + \$10 materials

Nerve impingement issues can mimic musculoskeletal problems. Some examples are tennis elbow (lateral epicondylitis) which may be from entrapment of the radial nerve, or Iliotibial band pain that can be from an impingement of the lateral femoral cutaneous nerve.

In this workshop you will learn ways to assess if a problem is from nerve impingement, and easy and effective ways to relieve nerve impingement by using movement to tension and glide the nerve along its path.

Upper Extremity Nerves

- Median Nerve
- Ulnar Nerve
- Radial Nerve

Cutaneous Nerves

- Lateral Femoral Cutaneous Nerve
- Cluneal Nerves
- Pudendal Nerve

Lower Extremity Nerves

- Sciatic Nerve
- Tibial and Peroneal Nerves
- Femoral Nerve
- Obturator Nerve

Comprehensive notes will be given with the class.

After completing this class you should be able to help your clients have a greater pain-free range of motion.

Nerve Glide for the Sciatic Nerve

Dr. James Mally (the one on the right)

James Mally, N.D. is an orthopedic massage therapist, teacher, and educational content producer with over four decades of experience. He teaches workshops around the globe and founded MassageLibrary.com.
