Gene Sullivan (Sunrider Sport)

I am 64-years-old and the longest touring motorcycle jumper in the world. Sunrider® products help make it possible to keep jumping through a wall of fire on my bike. I have trained with weights and sports since I was in junior high school. I've been a professional bodyguard, a pro-boxer, and in stunt work for over 30 years.

While I've always kept myself physically fit, I have not always eaten right. Training supplements, such as whey protein and thermogenics, were always a major part of my diet. Since I started eating Sunrider® whole foods (mostly NuPlus®, VitaShake®, Calli®, Fortune Delight® and Quinary®, but I also use Veros®, Sport Caps®, Mens Formula[™] and I love the MetaShaper®), I have discontinued all my prior supplements. I have not taken whey protein or any protein supplement thermogenic in well over 10 years. My weight lifting and training level has not diminished but increased. My strength and energy have increased and my appetite remains stable.

The life and energy in these Sunrider® foods are remarkable and beyond one's expectations. The convenience, concentration and superior care that goes into Sunrider® foods from beginning to end truly sets it apart, and it is the reason for Sunrider's success the last 30 years.
