

CELESTIAL CHURCH OF THE COSMOS II

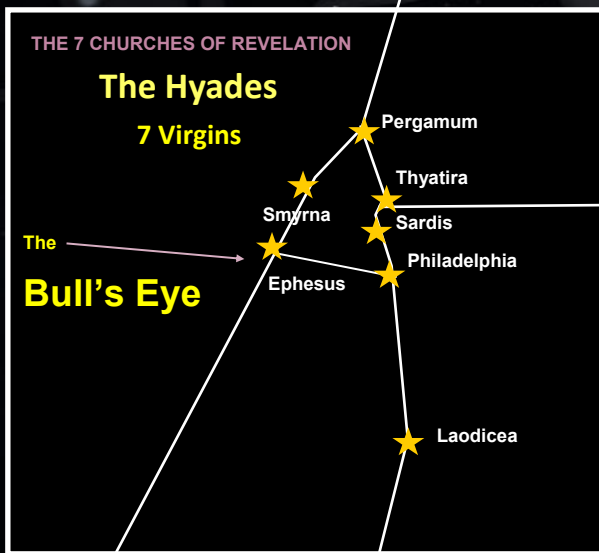

The purpose of this chart is to show the celestial correlation between the 7 Churches of Asia and the Pleiades in Taurus. The political map of both Greece and Turkey represent the opposing contentions as depicted in the Cosmos between Orion and the Bull, Taurus. It is the classic celestial bullfight between the Redeemer, the Hero Orion the Christ figure and the Beast that has captive the Maidens of the Pleiades. This Bull also depicts the iconoclastic rendition of the 'All Seeing Eye'. This 'Eye' corresponds to the star Aldebaran, the left eye of Taurus. In an other sense, Taurus represents the Luciferian elements of Islam that is in direct contention with Christianity or the People of the Living GOD, Christ Jesus. Even in the current geo-political nuances, this celestial contention is seen in the deliberate soft invasion of Muslims into Europe, mainly by way of Greece from Turkey. This is an attempt to destroy the last vestiges of a civilized Christian heritage Europe has. Since the days of Alexander the Great and Xerxes, the struggle has manifested in this front line. Greece is the land of the New Testament and the Epistle of Paul. Turkey is the land of the 7 Churches of Jesus Christ.

HEAVENLY PATTERNS

The Heavenly and Earthly types of the Bull with 7 Stars reveal that the Pleiades of 7 Stars mirrors the Taurus Mountains in Eastern Turkey. In reversed order, Taurus V-shaped head mirrors the V shaped order of the 7 Churches on Earth. Christ speaks in Revelation that the 7 Churches are as 'Stars' and that His grip on them is so strong as strong as a bull, that 'no man can pluck them out of His hand' according to the description of the risen and glorified Jesus Christ in book of Revelation.

Many End-Time scholars and Biblical student of the End of Days suggest that the vision of the resurrected Jesus Christ giving the vision of the 7 Menorah candlestick was not only a representation of the 7 Churches of Asia but a synopsis of the entire Church Age period. The typology of the Jewish Menorah typified the 'beginning, the middle and the end' as Is Jesus and even one of the titles Jesus introduced Himself with.

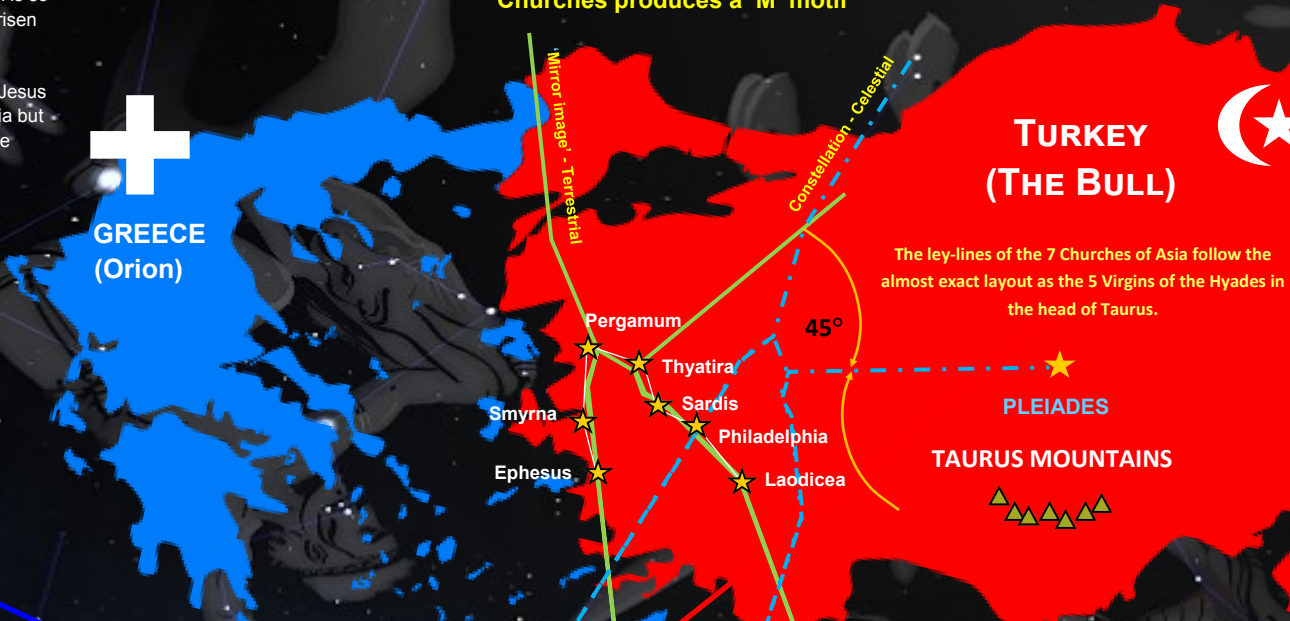

The 'mirror' image of the Churches produces a 'M' motif

PLEIADES

Reversed or mirrored to Earth rotated 180° and 90°

MIRROR IMAGES

The illustration attempts to approximate the notion that the 7 Churches of Asia Minor, that of modern day Turkey corresponds geographically to the Hyades of Taurus. The pattern is amazing and is laid out in the same configuration that appears to match which the constellation of Taurus is rotated. Without the slight rotation of approximately 45 degree, the 'triangle' or pyramid of the 7 Churches corresponds to the approximate distance the Pleiades are to the core of the Hyades in the head of the Bull. Also this rendition has Greece corresponding to the major star alignments. The ancient sacred sites of Greece correspond to the stars of Orion.

THE CHURCH AGE

Based on the topographical nature of the configuration of where the 7 Churches in Asia were situated, this 'V' or pyramid construct could also be a cryptic time clock as is the Great Pyramid for example. The pyramid pattern as a beginning at its base, an apex or capstone and a terminal point adjacent in the foundation.

Many believe that the Church Age is about to conclude as its 'time' has come to a conclusion which corresponds to the Commission given to the Church. A commission has an end. Jesus Christ will see to its end as He is the one who started it by 'lighting' the first candle, that of Ephesus which corresponds to the Eye of Taurus.
