

5

Name _____

Date _____

Consider the expression. Mentally estimate the sum or difference. Circle to show your estimate.

1. $\frac{5}{8} + \frac{3}{4}$

less than 1

between 1 and 2

greater than 2

2. $\frac{2}{3} - \frac{2}{9}$

less than 1

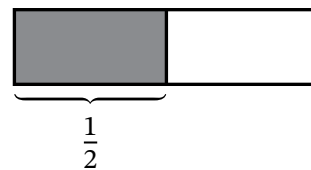

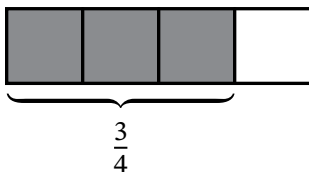

between 1 and 2

greater than 2

Complete each model to make like units. Then add or subtract. Each tape diagram represents 1.

3. $\frac{3}{4} + \frac{1}{8} = \underline{\quad} + \underline{\quad} = \underline{\quad}$

4. $\frac{1}{2} - \frac{1}{4} = \underline{\quad} - \underline{\quad} = \underline{\quad}$

Draw a model to make like units. Then add or subtract.

5. $\frac{2}{3} + \frac{1}{6} = \underline{\quad} + \underline{\quad} = \underline{\quad}$

6. $\frac{8}{10} - \frac{3}{5} = \underline{\quad} - \underline{\quad} = \underline{\quad}$

REMEMBER

Use the Read–Draw–Write process to solve the problem.

7. Toby spends $\frac{11}{12}$ hours walking every day. How many hours does Toby spend walking in 1 week?
