VORTEX

GREAT FOR PLANTING INTO COVER CROP!

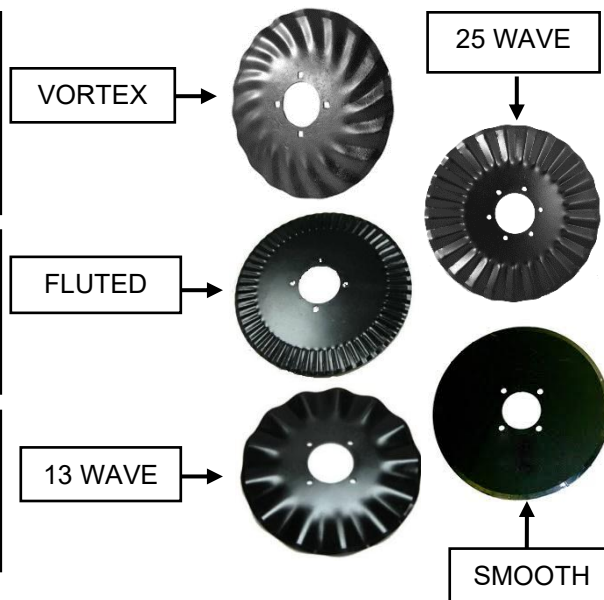

This blade is an excellent choice when being used on a planter ahead of a spiked closing wheel, or when additional stirring is needed. An excellent replacement for a "Turbo" type coulters.

25 WAVE

The 25 Wave coulters work a 5/8" wide strip in front of a trailing knife or nozzle application. This coulters is less likely to pull "Chunks" out like a 13 wave in wet soil.

13 WAVE

The 13 Wave is the original coulters used by many O.E.M. manufactures. In most seeding conditions we feel this coulters has poor penetration and seed depth.

PLANTER MAINTENANCE TIPS:

*Check your seed tube guards between the opener discs for proper operating width. A John Deere or Kinze planter should have a guard width measurement of no less than $\frac{1}{2}$ " at the bottom, and $\frac{3}{4}$ " across the top.

*15" seed openers should be replaced at an overall diameter of 14.5".

*Use an **equal amount** of shims on each side of the opener.

CARLISLE SPOKED GAUGE WHEELS

Traditional closed gauge wheels tend to plug when planting conditions are less than ideal. The Spoke Planter Gauge Wheel from Carlisle helps you avoid that frustrating downtime. The open-wheel design allows soil and residue to flow through the spokes, so you spend more time planting and less time cleaning out gauge wheels.
