Two Minute Warning

January 18th, 2021

My dear ones, this is a communication I believe should be listened to.

Starting soon, maybe as soon as tomorrow there will be a 3-5 day rolling blackout, for sure it will happen on Inauguration Day. Fill your tubs with water , there will be no running water , fill cars with gas , although

during the blackouts no one is allowed to leave their homes ... gas stations shut down, hospital workers will have to stay at work , no internet , cell service , you can use landline if you have it . This is to prevent Antifa and BLM to be able to communicate to cause riots, and for the military to do its job without interference. This is coming from my friend's husband's top commander. They have been given permission to tell loved ones to get ready.
