

## Industrial Rope Rescue Technician (IRRT)

---

Falls are the number 1 killer in the construction industry and the number 2 killer in private industry, according to the Bureau of Labor Statistics.

The OSHA and NFPA compliant Industrial Rope Rescue course is designed to prepare companies and workers at height in the occupations covered by OSHA that require Fall Protection and Fall Arrest.

The IRRT program provides training and education on the safety requirements for personal fall arrest systems, guidelines for minimum requirements for a Managed Fall Protection Program, Safety requirements for positioning and travel restraint systems to help prevent falls, and safety requirements and Hands-on training for Assisted-Rescue and Self-Rescue systems (ANSI/ASSE Z359.4).

This course is approximately four days—32 hours total with 4-6 hours of classroom and 26-28 hours in the field. The class will be held over 4 days. This agenda can also be adjusted to fit each group's training objectives if necessary

Standard:	OSHA and ANSI
Prerequisites:	<b>None</b>
Equipment:	<b>Rope</b>
Tuition:	\$695
