

What is tarot? Why should I learn tarot?

Learning how to use tarot cards requires a mix of intuition and familiarity with the symbols of the tarot deck. There are many ways to interpret the cards and eventually everyone develops their own technique. Shari will go through a step by step process to get you started reading your cards.

Tarot is an incredibly powerful tool that gives you insight and perspectives for yourself and your friends. It reflects back towards you your own thoughts, feelings, dreams, and wishes.

Being able to master your own inner world gives you a stronger ability to navigate through life's challenges. Whatever walk of life you come from, tarot helps you unlock the power of your own intuition and inner wisdom. With enough mastery, tarot becomes a compass you can use to become your best, most fulfilled, authentic self.

I'm not psychic, can I still learn tarot?

Of course! You don't need any special abilities to learn the tarot - only willingness to tap into your own intuition.

The tarot is not about telling your future in the traditional sense or connecting with spirits. It's about finding your own center and developing your connection with your inner self. Every one of us has the ability to learn tarot within us.
