INCLUDES SILICA FREE ABSORBANT

OSHA announced the Final Rule for Workers' Exposure to Respirable Crystalline Silica in June 2016. Crystalline Silica has been classified as a human lung carcinogen by OSHA*. This rule is to be phased in starting June 2017 and affects all clay based absorbant products that contain Crystalline Silica.

* OSHA 29 CFR PARTS 1910, 1915, 1926
