

Vegetable Share

1. Becoming a Part of Our Farm

-What is a CSA? CSA stands for Community Supported Agriculture. For many years, local farms have utilized CSA's to encourage consumers to seek goods from local farmers rather than commercially grown items.

-CSA's are a great way to provide your home with fresh, locally grown, farm raised products. With a CSA from our farm, you will be receiving goods produced from our farm, for over a season long. Each month a new item will be featured, or, if you enroll in both our Vegetable and Meat CSA your entire grocery needs will be complete with a monthly selection of Beef, Pork, and Chicken, enhancing your weekly Vegetable share.

-Members of our summer CSA receive a farm share for 18 weeks, from the middle of June until the middle of October. The average weekly share contains 7-10 different vegetables every week and will provide our members with 30-35 servings of fresh and seasonal produce from our farm.

The vegetable selection will change throughout the season based on what is ready to harvest each week. We are committed to providing you with healthy, fresh and sustainable produce in order to foster a greater connection between consumers and the farm where their food is grown. We are proud to be using our twenty years of growing experience to build a healthy community around us.

3. Sharing in the Risk of Crop Failure

Farming is one of the few remaining industries that is still beholden to the whims of mother nature. While we attempt to grow a wide variety of crops that will thrive in a variety of climates, extreme weather conditions (i.e. constant heavy rain, hail, frost, Drought) can affect crop production and damage produce. We promise to do our best to provide you with a bountiful share each week and our crop plan includes overage for unexpected events. The quantity of produce, however, may vary from week-to-week due to extreme weather, insects, or other production factors beyond our control. As a member of our CSA you are agreeing to share the joys of a bountiful harvest as well as the risk of crop failure with us and other members. In the unlikely event of a crop failure, our procedure is as follows:

If only a small portion of crops fail, we compensate for the failed crops by filling your share with other crops grown on the farm that are ready for harvest at that time. If a large portion of crops fails, we may not be able to deliver any product in some weeks.

4. We give our CSA members top priority

In addition to our CSA, our farm also sells at farmers markets, and our two Farm Stands:

Ox Hollow Farm at Good Hill
