

# PCMT User Training Course

ATSI offers a comprehensive training course for PCMT users. Proper user training is an essential part of a successful preventative maintenance program. The training is offered as a self-paced video course at [www.pcmtcourse.com](http://www.pcmtcourse.com)

- The training course applies to both the **PCMT-8000** and **PCMT-8800**.
- Students may take a certification test at the end of the course.
- Students who pass the certification test will be given a training certificate.
- Training qualifies for TARP points for IMSA members.

The screenshot shows the PCMT-8000 Test Manager software interface. The 'Test Setup' window is open, displaying various configuration options. A 'Certificate of Completion' dialog box is overlaid on the software, indicating that John Doe has successfully completed the PCMT Training and Certification Program. The certificate is issued by ATSI and mentions the 'PCMT Certification and Training Seminar'. The background software window shows test results for 'Firmware Version : 0.94' and 'Software : PCMT-8000 Test Manager 0.3', with a 'Monitor Response: No Fault (as expected)'. A 'Failure count = 0' is also visible at the bottom right of the software window.
