**Tensioning
Solutions**

Banner Stretching Frames *September 2018 Newsletter*

**Seamlessly stretching banners to corner buildings
See video installation from A to Z,
Cleveland Browns stadium, Fifth Third gate**

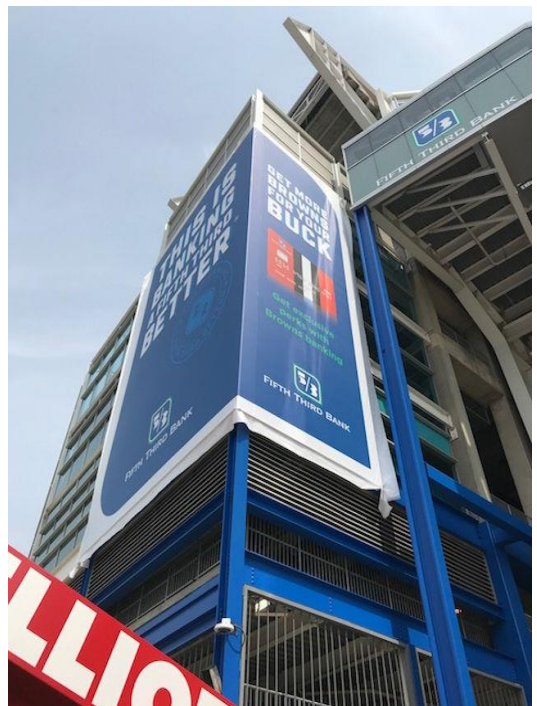

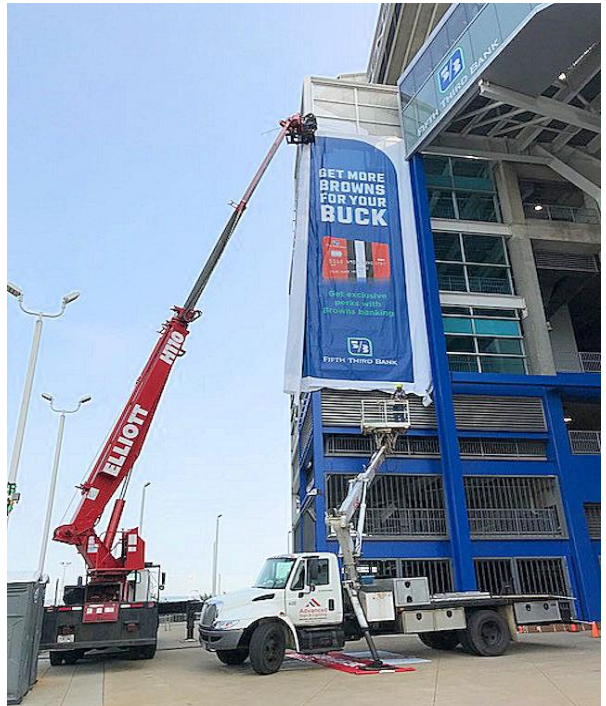

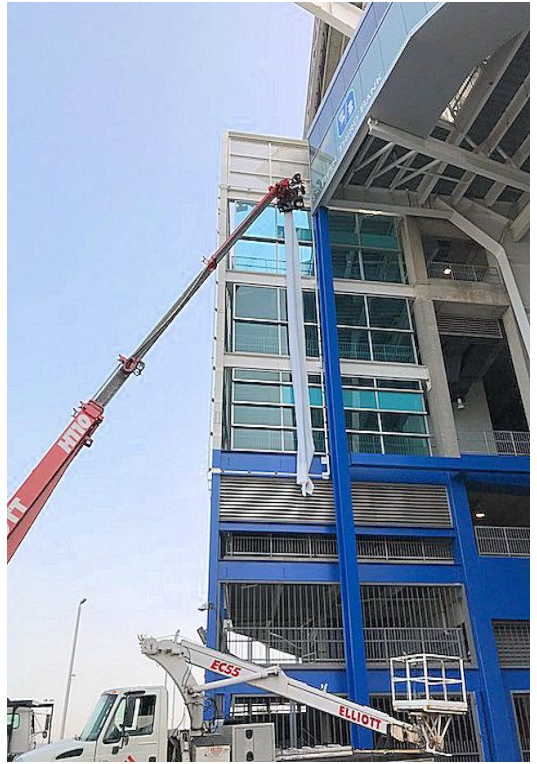

(Time lapse 30 seconds)

The printed banner is a single panel, with our banner stretching system there is no need to cut the banner or join separated panels at the corner.

This gives a great look to the entire graphic with a seamless view from side to side.

Design and installation were realized by West-camp, OH.
