

Humanizing Risk Management and Regulatory Compliance

Global Compliance Associates, LLC is focused on developing insights into advancing Enterprise Risk Management by focusing on the human element which represents the vast majority of operational risks.

GCA was founded to create the first Cognitive Risk Framework for Enterprise Risk and Cybersecurity.

"Understanding the Human/Machine Interaction"

James Bone, author of ["Cognitive Hack, The New Battleground in Cybersecurity...the Human Mind"](#), is the founder and principle consultant with GCA developed the Cognitive Risk Framework based on cognitive and behavioral economic research.

Decision Science

Risk management is about making the most informed decisions about the opportunities and threats facing an organization. GCA combines insights into leading edge technology and decision science to better inform senior executives to prepare and retool ERM for the 21st century and beyond.

TheGRCBlueBook

TheGRCBlueBook is the largest online directory of GRC tools for risk, audit, compliance and IT professionals. TheGRCBlueBook was founded to educate the corporate market on leading edge technology to manage your business and risks.

"Anyone who has never made a mistake has never tried anything new." Albert Einstein

TheGRCBlueBook is also dedicating to working with GRC solution providers to reach a global market of risk, audit, compliance and IT professionals seeking the most effective solutions for their business needs and risks.

Risk Advisory Services

GCA combines years of experience in Enterprise Risk Management with research in decision science, market intelligence, behavioral economics and an emerging technology, collectively called Cognitive Security, to tailor a more nuanced and cost effective approach to risk management.

GCA puts the "human element" back into Enterprise Risk Management.

Key Offerings

Advanced concepts for managing risk, a platform for GRC vendors to educate a savvy market about their solutions, and risk advisory services founded on cognitive science.
